Thread: [Your bitcoin transaction failed to send.Please try again](#)

n0\$f3ratu\$ - November 29, 2018, 5:32 am

Hello.

As the title is saying I can't send payments using my wallet. (blockchain)

I am using Opera browser.

Nothing has changed from my part.

This is the first this error occurs so I have no idea how to fix it.

Thank you in advance for your help.

Try other browser or their mobile app, also check if you are sending tx with enough fees or if there's some dns (network peer) related issue.

If it happens again, wait for some time it could be their server related issue and it'll get fixed.

Have you tried with chrome / mozilla browser and even on mobile app of blockchain .If you don't face this problem means the problem would be on opera side .

Thank you guys for all your replies.

I tried other browsers, I even increased the fee to 100 when their upper limit is set to 46, yet I get the same error.

Probably is from them.

I will wait for a little while and then I will try again.

If still won't work I will contact them.

Again THANK YOU TO ALL OF YOU!
