Just curious. I never really got into shopify, but if you do use it what's your average daily & monthly earnings?

I make around \$400 daily off my stores, \$100 and \$300.

I did around 5k a day in sales on my 1 general store. Was a really great source of income.

Yeah, I'm looking for something more "legal" source of money, long-term.

I think that it still works depends on how you build your brand
