Thread: [Someone to configure my RAT?](#)

b1nary21 - November 30, 2018, 8:14 am

Hey. I need support to setup quasar rat ...

1. I bought ra4w vpn

2. Idk how to continue? configurate dnss? configurate dynamic ip?

if someone have time to configurate it through Team Viewer PM ME. I can pay you \$

I use skype, whatsapp, PM ME

Regards ?

SysAdmin - November 30, 2018, 9:06 am

If you don't know how to continue, you shouldn't be doing it in the first place.

Google is your best friend.

I second this completely. Also I think that here there's enough material for you to read. Just look for it.

If you've got the money to throw, I highly suggest checking out Businesses' R.A.T setup service.

I third it.

Also, screw RAT's. Just pop a reverse shell and pwn that bitch.

CarbonBasedHax - November 30, 2018, 1:45 pm

Try using Mullvad VPN, all the Hackforums VPNs keep logs.
