Thread: [Any advice for monetizing a 400k genuine instagram?](#)

NLSProductions - December 2, 2018, 9:48 am

Hi guys,

Basically my girlfriend was on 2017 Love Island in the UK and has close to 1/2 a million followers. I am not really asking for you to believe me, as I do not really care about that but any advise or any offers from pro's to make as much genuine money from an account that has risen over 400k followers in a year would be great. If someone is interested in working with us, as long as they are genuine and with a white hat system I would consider.

any questions PM me..

We just want the best from the account.

I can get you sponsors but I'll need proof and a cut of course.

Try getting some sponsors, clothing lines, jewellers etc.

as long as you can promote their products they'll pay you.

CPA is always a good option.

Send emails to shops of the niche that your gf use in the account and some of they'll give products and pay ?

Send DM's to different companies that you would want to work with and try to negotiate a contract...
3 post a month for 2000\$ per month for example :)

Thanks for all your help. Any ideas are welcome.

So better to contact companies via instagram so they see the account details.
