Thread: [men nipple question lol](#)

Tsach3vTP - December 2, 2018, 11:43 am

Does anyone's nipple size changes randomly? For example sometimes my nipples are super small but sometimes they go huge af and sometimes they are both different where one is way bigger than the other... I searched up on google but it looks like that changes with age permanently but mine is different.

? If you're cold they're bigger ?

Bacardi Cola Lime - December 2, 2018, 11:50 am

What in hell did I just read? xD

Godshaq - December 2, 2018, 11:51 am

what the fuck lol
if ur cold it goes big
like womens lol

It might mean that they're ready to lactate. Mine do that until I suck milk out of them. If you have a puppy or a hamster or something let them slurp on your nipple.

It's natural and nothing to be concerned over.

And we have a winner! Correct.

Cold = small

Warm = big

Have you never gone swimming OP?

Men nipple's explode at -50 celcius, and 358 fahrenheit they expand so hard you might get an erection.

Pochino - December 2, 2018, 1:02 pm

I was in a unique state of amazement as per the thread's title, combined with compulsion to get 6 more bytes to gamble on blackjack. You're quite right, the incoherence is off the charts. I don't think I've ever misused 'new' for 'knew', I think it's time for my vasectomy.

PerfectStorm - December 2, 2018, 7:10 pm

Nopey nope. Never noticed this boy.

sh4moon - December 2, 2018, 7:19 pm

wtf is this thread lfmoo. your nipples end up different sizes?! I died inside when read this. I'm going to ban myself and see you preteens later.
