Thread: [Nvidia releases the Titan RTX graphics card but none of us will buy it](#)

webdev77 - December 3, 2018, 11:54 am

That's one nice piece of hardware, but it's not something gamers are going to buy.

<https://www.guru3d.com/news-story/nvidia-releases-titan-rtx-with-72-rt-cores-and-24-gb-gddr6-at-2499.html>

Biggest difference between RTX 2080 Ti and the Titan RTX is memory and 32-bit floating point accumulation performance. Titan is about double the 2080 Ti in that regard.

Gt403cyl - December 3, 2018, 12:28 pm

Yeah useless for gamers.

For workstations better, but still it NEEDS to make the buyer money to justify it.

Treebeard_ - December 3, 2018, 1:02 pm

This will create some of the best times to buy a 1080Ti.
