Thread: [insomDL | Simple .NET Downloader | Long Lasting FUD times | Active](#)

Goldmouth - December 3, 2018, 12:36 pm

A little downloader I've been messing with for sometime. I refudged not too long should still be FUD with icon. Will keep this project alive as i learn more code.

Todo:

Add Assembly changer

Better FUD Module " state of the art junk generator" ?

UAC Exploit

No drop

btw a suggestion is that you add webcam viewer

also the keylogger gives me a error (prob cuz im testing the rat on my self)

also another error is that after you stop listening to the port the client crashes
