Selling my Jasper RGH2 console (MW2 Edition)

Recently RGH'd it after being gone from the scene for 2+ years.

Includes,

Coolrunner REV C chip... Nand wires are still installed on this console.

Updated on current 17526 dashboard, with Ninja plugins...

Has XeXMenu, Dashlaunch, and a few other misc shit.

I will include the original nand, KV, CPUKey, and the newest nand(rgh2).

Boots in under 30 seconds

Price,

Sell the console AS-IS for \$100.00 shipped out the door

If you want an external HDD or USB with preloaded stuff, I can add that in with an extra fee.

I'll accept Bitcoin and PayPal.

Console is located in the USA.

Message me if you have any questions. Just looking to get rid of this console.
