Thread: [How do I use the Rocketr Embed Generator with png/jpg images instead of javascript?](#)

James Burnham - December 4, 2018, 3:13 pm

Code is like that

```
Code <a class="rocketr-embed" data-product="thisiswheretheproductidgoes" data-color="#81C868" data-text="Buy Now" data-width="200px" href="https://rocketr.net/buy/thisiswheretheproductidgoes">Buy Now</a><script type="text/javascript" src="https://static.rocketr.net/assets/RocketrButton.js"></script>
```

I want to use png button instead. How would I do that?

zeroday - December 5, 2018, 2:02 pm

It would require a little bit of coding. If you send me the website and the image I may have a little spare time and be able to do it for you. It's very simple but I'm assuming you don't know HTML and CSS so.

Thanks, it was easier than I thought. I missed some info but rocketr support helped me.

This is the code I had to use

Code <html>

<head>

```
<script type="text/javascript" src="https://rocketr.net/assets/RocketrEmbedCustom.js"></script>
```

</head>

<body>

```
<input data-rocketr-product="THISISPRODUCTIDFIELD" type="image" src="THISISIMAGEURLLINK"/>
```

</body>

</html>
