? Advice ?

If you want the best runtime result I recommend to use CypherIT with mLNK v2.0 it is the best combo!

What sort of UAC bypass are you implementing?

SIM-4053886 - December 5, 2018, 6:19 am

Very good product, powershell allow to bypass Windows Defender !
If you use a good crypter + this tool it is the best combo.

Same excited and waiting for the product

jer333 - December 8, 2018, 1:35 am

Hello everyone, replying with a quick review / vouch. ?

Support is excellent, the seller is a really awesome guy. I received my product quickly, one month subscription.

Honest review:

Product works as intended using HTA method. It's very clean, it's very small, and it's very innocuous.

I've had problems with the powershell method and the XML method thus far, however, it may be problems with my setup. Support is, however, great. I have no doubt that they will assist me with this as they have been. The biggest point I have to make is that mLNK does in fact do what it advertises in my case and I would recommend it to anyone who's having some troubles with smartscreen.

Thanks again to Qismon. He's selling a good product.

Yeah I'm not too worried, it is Microsoft we are talking about.

Will be fun testing though.

Im heading out on vacation starting today and will be back the first week of January.

If you would like to purchase still there is no problem I will be checking selly from time to time, but it may take a day or three to get back to you so please do not panic. Your license time will start when its activated.

Ren should still be around to help with support if needed.

In the new year we will be adding something new many have been requesting. A new method so you can use a PDF icon without sending an extra icon, or the remote PC having the icon locally. ?

Not .link, but .lnk, so a shell link a.k.a shortcut. So just like a regular executable file, a double click on it will launch it.

No its not a spoofer

It changes your .exe into a .lnk

Yes your file needs to be crypted, before... mLNK is not a crypter.

It will bypass SS alert and Windows Defender

Does this convert .exe to .lnk and it is able to penetrate all this domains and host that does not accept .exe? And what is the execution rate?

I have just paid for this product for the private stub and downloaded but its not opening any application.

Yes your application will be execute when the .lnk is clicked.

You can not upload a .lnk as its a shortcut...

The execution rate is high.

I've bought mLNK and I can tell you guys that every function of the software is working 100%, I'm simply amazed.

Tested it on a 100% updated Windows 10 Enterprise Edition OS (05/02/2019) and when I executed the generated file, it was flawless, smartscreen didn't popup.

This is one of the rare softwares on HF that you really get a full working software, I recommend it 100%.

boussoula. I'll state it again. Your "friend" was ban for trying to SPREAD malware on the server. Also he was ban on HF for probaly the same shit!

He can fuck off and so can you! Have common sense and read the TOS!

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

I am online and able to assist anyone!

No idea what your asking. This is mLNK not CypherIT

mLNK will convert your .exe, vbs, dll, js into a .lnk file (shortcut)

yanito - March 19, 2019, 2:42 pm

Ey mang unblok my nigga Admin off Discord ye? He wanna chat

Ren And Stimpy - March 19, 2019, 3:50 pm

He is LIFE BLOCKED. Stop making multi-accounts and harrassing us. Jesus Christ KID
He is ban for spreading his malware!

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

Ren And Stimpy - March 19, 2019, 7:13 pm

He is not getting unblocked! Like i told your other 4 muti accounts!
He attempted to spread his malware, he is LIFE BAN

Kindly fuck off and read the help documents!

what are the prices ?
link to buy

Ren And Stimpy - March 28, 2019, 8:02 am

The prices on the thread are incorrect. As Qismon was unable to edit this thread so he made a new one. Then they junked the new one and opened this one.
Qismon will be updating with the new prices

1 m - \$50
3 m - \$110
Private - \$100

Qismon - *March 28, 2019, 9:41 am*

New thread is made. ?
