Accidentally hit "Stay" when I had a 6 but still won

Playing Blackjack until I hit 15k so either I'll lose everything today or had a nice stack.

Update: Just lost five 500 bets in a row ? ? Dealer getting constant 21's.

Whelp, lost over 11k bytes

No I'm not.

Lost 5k, then pulled crypto out at a loss of 1k bytes and I was at 11k today now I'm at 7.

That's why I'm going for 15k or losing it all or else I'll feel like I lost.

Never seen such a rigged blackjack game haha.

I've gotten maybe one 21 hand out of 50 games and the dealer gets 20 or 21 hands 80% of the damn time.

Yeah, these games need some re-coding, no one is walking away winners really. When the BJ dealer is getting 5-6 21's in a row that's some bullshit ?

He would bankrupt casinos if he was a real person. Whatever, just pixels but I'm not doing the whole saving up bytes things again ?

No the blackjack is very fair. Randomized deck(s). It doesn't pick and choose when you should

win/lose. You do that by hitting/staying. The deck is already determined when the hand is started.

Everyone says this yet it is completely random. The game doesn't decide if you are going to win or lose that round... lol. A deck (made from multiple decks) is generated and used as if it were real life. It doesn't swap card position based on your performance.

In my limited experience of gambling, I have never seen the dealer make 6-8 hands in a row and beat all. Then again, consecutively

Yeah I've probably bought ~\$120 worth of bytes in the past week and lost them all. I'll take 2k bytes and turn it into 5k... and then like you said, no self control I just keep going. I never know when to stop it's like I've already made up my mind that I'm either making an infinite amount of bytes or losing them all.

You're my favorite staff member, Xerotic (don't tell the others) but I think if it was really fair the value of bytes would go down because so many people would be winning. It has to be in the favor of the dealer to keep the bytes economy stable.

Now if you'll excuse me I need to go purchase more tin for my hat.

Lmao that is true smh smh ???

**Effexion** - December 6, 2018, 11:12 am

I find I get bursts of wins and then they piss on my parade for a few hands.

I'll be up a bit and then lose like 5 in a row.

**Physics** - December 6, 2018, 1:18 pm

Bro this shit is soooooooooooooo rigged.

How does the dealer hit 19 4 times in a row.

And if he doesn't hit 19 he hits 20. Get the fuck out of here.

**Mix** - December 6, 2018, 2:17 pm

Fucking hell wat are those chances I lost 500 yesterday cus of me pressing stay instead of hit and I was pissed but wow!

How many bytes have you lost exactly? ?

**Crypt** - December 6, 2018, 3:19 pm

I won't lie, I'm tempted to see what I can turn these 100 bytes into.

Whelp, I just lost every game ? ?

**Caliban** - December 6, 2018, 7:12 pm

I think i lost 5k bytes before i took an angry vacation ban

I know, I lost 11k.

You'll stay that low if you keep gambling though haha. I won't lie, going back to blackjack is tempting.

I kept getting to around 150 and losing it all. Not much but I realize it's just not worth it and in the end I always lose it all.

Haha, thanks for the bytes.

You should take a break until you hit 20k bytes.

You'll easily have 10k soon.

I want to get back to 10k haha. Going to be quite busy from now on though so I may not be able to post as much.
