Perfect Job on the video TE,
Shows just how accurate OAB really is!

iKronos - December 6, 2018, 3:34 am

What is this exactly? A triggerbot? Shoots when target is in the crosshair?

Not just an simple triggerbot but a very advanced private developed triggerbot with body recognition, rapid fire support, full screen support and alot more.

The accuracy is higher then 90% currently, we are close to perfecting that.

As you can see in our video, it shoots faster then a human brain can comprehend hence the slow motion parts in the video, you won't miss a shot with this tool.

In the long terms you'll see many great features such as human like aim assist, movement predictions and a 100% accuracy (which is almost accomplished).

Vouching for this chill bro right here.

Good luck with sales bro, if I played OW - I'd have definitely marked this as a must-have.
(Too bad - I am a R6S sucker. Wish it had something similar to this).

Regards, Wolf ?

Purchasing now, I also have sharpeye and am not too impressed with it tbh

Would this work for something like McCree or Widow also?

Purchased - looking forward to using!

OAB is developed for Ashe but it does also work with: Soldier76, Tracer, McGree, Genji, Bastion, Lucio, Pharah, Reaper, Sombra, Zenyetta, Torbjorn, Wreckingball and Zarya.

It does also work with Widow but we wouldn't recommend it at this point, however we're developed a Widow mode aswell.

Our bot has body recognition, you can't compare this with others, it's accuracy is almost perfect.

Thank you for the purchase tho.

Dankdood - December 6, 2018, 11:55 am

Bought and tested it for 3 games (1 quickplay, 1 3v3, and 1 comp).

IT WORKS AMAZINGLY.

everything is fluid and it does not lag the game at all.

Before buying this, understand that it will not do super mechanical things for you, so do not expect to sit down and let the game be played.

Another reason why I love OAB is that it works with other heroes other than Ashe. So if she gets taken (usually happens) don't worry about it!

This is bot can be utilized by anyone in any elo. The better you are, the better the bot can be used.

About the seller,

Time zones are different so please respect his time and he'll respect yours. He is amazing and will do his best to give HQ service and support.

He will answer your questions and answer more before even asking! He's great.

BUY THIS NOW BEFORE THIS AWESOME DEAL EXPIRES. I am sure I would regret it if I did not get this lifetime subscription.

Thanks, OAB team, I look forward to working with you for future updates on your projects :)

OAB HUD: 10/10 it's clean and responsive

OAB settings: 7/10 not many, but this is still an early release. I AM SURE THIS WILL TURN 10/10 UPON FUTURE RELEASES

OAB performance with ASHE: 10/10 flawless

OAB performance with other heroes: 9.5/10 noticeable errors, but still gets the job done

customer service/support: 10/10 understanding, supportive, and willing to help if you DESERVE it.

We are currently working on a "widow" mode within OAB aswell.

If you have any suggestions or feature requests then please let us know.

Shamblez - December 7, 2018, 3:35 pm

What is OAB and why is this so cheap

Triangle Eye - December 7, 2018, 4:39 pm

(Dec 7, 2018 04:35 PM)Shamblez Wrote: [\[CITE\]](#) What is OAB and why is this so cheap

OAB stands for Overwatch Ashe Bot which is a highly advanced and intelligent triggerbot with a near to perfect accuracy.

The price is so cheap because we've just released a couple of days ago and this is the first version that is being sold, it's also a way to build reviews faster.

Once our next version is solid you can expect and heavily increased price based on subscriptions aswell.
