Thread: [\[AUTOBUY\] .ELYSIUMS. BTC AUTO GAINER V2 | INVEST AND EARN INSTANTLY | BIG CASHOUTS](#)

Elysium - December 6, 2018, 11:12 pm

Please follow the links below to create an auto-buy contract.

Proof(Withdraw History from the past week):

Which script to choose:

If you want to play it safe while getting the hang of using these scripts, i'd recommend either script #5 or Script #1.

If you want to make significantly more profits than script #1 or #5 while still remaining relatively safe, i'd recommend script #3. Script #3 is my personal favorite.

If you want to make maximum profits while living on the edge, script #4 is the one for you.

Instructions on how to use:

Go to www.bustadice.com and register for an account.

Transfer initial investment to your bustadice account.

Select 'Play'

Click Script Tab

Copy and Paste the script provided

Start the script and monitor closely.

Recommended use:

Start with the recommended amount listed in the image. After increasing your profits, continue to withdraw in \$10-20 increments. While these scripts are excellent for gaining quick profits, they can and will drain your balance if left unattended. After playing a few times you should be able to easily withdraw all of your initial investment and continue playing with just your profits.

How to purchase:

Click the image and you will automatically be redirected to post #2 of this thread. After a contract is created the auto-buy link will be shown.

FAQ:

Q: I have paid for the script and there was nothing instantly sent to me.

A: Because the payments made to Shoppy are using crypto payments you must allow time for 2 confirmations. This can take anywhere from 10-60 minutes under normal circumstances.

Q: I lost my investment... Why did this happen?

A: Bear in mind that you must follow the recommended investment for this script in order to see profits. 90% of cases where the people loose their investment is because they didn't follow the recommended investment. I have caught a few people lying about this and requesting a refund. Don't be an asshole. If you try and start with a lower than recommended investment, you will end up loosing it because the script doubles bets on a loss, meaning that it will cause a fluctuation in balance before winning and earning a big profit.

Final note: Please note that these scripts are gambling based. Because this is a digital item, there are no refunds.

If you have any issues with the scripts, I still encourage you to come talk with me before sales trashing or anything else. I am more than happy to help you out as I would prefer you have a positive experience while shopping with me.

Hi. I would just like to make it known that my signature was bought for the purpose of promoting this and that I'm not involved with it. Seems like an interesting script but I'm not to be held responsible if anyone that buys it looses their deposits. Good luck with sales!

It's early, but I'll vouch for this. Received the script 25 minutes ago. Set it up about 20 minutes ago. Since then I invested 6,000 bits and I've already made a profit of 3,000!

I am glad it is working for you. To answer your other question, there are no limits to how many times you can withdrawl in a day. I always recommend pulling out 1k after you get 1k above your initial investment. That way you'll quickly pull out your initial investment and just be working with earnings.

If investing let's say \$200, what will this be able to generate me the first day, and what's the chance of loss?The profits are really dependent on the user and the script that they are using.

With that being said, i'll try to answer your questions in order:

-What will this be able to generate me the first day? I wouldn't recommend an investment of \$200 to be honest. I'd recommend around \$50 to start with. Using Script #3 or #4 for a few minutes at a time can help you double your profits relatively quickly. As always though, I recommend withdrawing 1-2k bits at a time once you reach 1-2k over your starting investment.

-What's the chance of loss?

This is a hard question to answer because there is no finite percentage or odds of losing. It is certainly a possibility as these scripts are gambling based, however if you carefully watch the scripts and hit the "stop" button any time it starts to loose more than you are comfortable with, you will be able to mitigate the chances of loosing by a lot. Also while we are on that subject, it is not uncommon to loose ~200 rounds in a row, however when you do win the final round you will generate enough profit to counter everything that was lost in the 200 rounds prior and still turn a good profit.

Just purchased the complete script package, Elysium has been very communicative throughout the buying process, and gave a 25% discount from his promotion till the 1st. Will update thread with individual results of each script!

EDIT:

Okay, its been approximately 30-40 minutes of run time on the full script package, i have given each one a short spin time, and found each one unique in its betting properties and how it handles losses/win ratios. I have already doubled my deposit, and will continue to keep the post updated as i gain profits/losses. thanks again!

I am now releasing Script #6:
Script #6
-LOW/MEDIUM RISK
-HIGH RETURN
-8,000 BIT INVESTMENT (.008)
-STOP LOSS FEATURE

This may be my new favorite development. I have spent a lot of time refining this script and I have included a stop loss feature to end the scripts upon too many consecutive losses. Just in the testing/development phase I managed to turn my \$40 investment in to \$110. This script will be sold for \$20 and will also be included in the ALL SCRIPTS package.

...

Rest assured, these are not public scripts nor are any of them the same as another. While they may use similar strategies i.e the martingale probability theory, they have different parameters, including base target, double down(#), stop loss, etc. If you'd like to know more about the parameters and qualities that each script was designed off of, feel free to send me a Private Message and I can go in to more detail.

Update:

Script #5 has been redesigned off of the same principals, however I have slightly lowered the increase on loss feature and I have also incorporated a stop loss feature to stop after 40 consecutive losses. From my calculations, this gives you somewhere around a 95% chance of winning within those 40 rounds while keeping the losses under 2k bits(1778.87 bits to be precise) if you somehow manage to loose 40 rounds. The incorporation of these new features has also allowed for a lower starting investment with script #5. During my testing these changes have proven to be very profitable.

ThanksQuestion #1, Short run time:

The script can not be left unattended, I recommend running it for short periods of time and stopping it after a big win. It can be run again whenever you're ready. Stopping it also allows you the opportunity to withdraw back to your starting balance. I recommend withdrawing every time you get ahead by 1k bits.

Question #2, Win rate:

This is really dependent on the person, most people report a big win within 200 bets. As long as you follow the tips I provide in the PDF sent after purchase as well as the recommended investment, you should have a pretty high chance of making a good profit.

Question #3, current discounts:

I am currently offering 25% off of the all scripts package. If you are interested in this discount you can use the code "ALLSCRIPTS25OFF" during checkout on Shoppy.

If you have any additional questions please feel free to send me a Private Message.

h44zard - December 30, 2018, 12:44 am

I have bought his method script no3(i think it doesnt really matter which script do you buy, you will lose your money in a matter of time) and all what i can say for now is that this doesnt look so pretty as it should be.

If You dont want to lose your money then wait for my review it comes in a few hours(i will edit this post)

Thanks

EDIT: So in his ebooks says that there can be c.a 200 losses in a row but no worries coz finally it will win, ye too bad for me i had more than 400 losses in a row which made my wallet 80% lower, then with rest i started to play slowly and when it shot more than 200 losses in a row i made manually an stop and then started script one more time but it didnt help at all , that mean i have lost everything. Of its script 3 or script 4 or script 10, you will surely lose your money.. Thats why DO NOT BUY THIS IF YOU DONT WANT TO LOSE YOUR MONEY...

I did everything what he said and what in ebook stays but that really doesnt matter coz its everything a bunch of lies to earn some money for op.

He offered me as "refund" another scripts for free hahah thats really funny, maybe i should invest again and lose my money again to see if "other" scripts are working?

The best part is that before i bought the script i asked him to show me if thats really working, he showed me and he lost everthing oO He told me it was a bad luck because he "changed" something but no worries with your script that wont happen...

I can prove everything with screens from gameplay, conversation etc I JUST HATE LIERS...

ITS NOT EVEN A SHORT TERM MONEY MAKING SCRIPT!!!

Please stop selling this shit...

Please stop buying this shit...

Cheers, h44zard

1) Do NOT leave the script unattended.

Spoiler [\(Click to View\)](#)

2) I can see your profile and I know when you're lying to me. You didn't loose everything, you lost 2500 bits which is equivalent to roughly \$9, and less than the recommended starting investment of 6,000 bits. You can't win back the price that you spent on the script and then tell me that it doesn't work and you want a refund. It is not my fault when somebody leaves the script unattended and then looses some. The PDF included with purchase specifically says "While these scripts are excellent for gaining quick profits, they can and will drain your balance if left unattended." In this case you won 4,000 bits(as seen in the screenshot below), and then decided to keep going and leave the script unattended.

just withdraw every 1000 or 2000 bits

don't think you'd get 10k a month by doing this

Thank you for the vouch. It is always great to hear customer success stories. It genuinely makes me happy when people are happy with my products. While the calculated success rate is *low*, ultimately that is required in order to make a good profit. With the multiplier of 100x the odds are about 1% however when you get the win that is what will turn a 20 bit bet in to 2,000 bits. The scripts are specifically calculated to increase the bets slightly on a loss in order to recover any losses and make a GOOD profit.

Also a big shoutout to you for following the tips provided of withdrawing every 1k. A lot of people have the tendency to think that the scripts are impervious to losses and leave it unattended for an extended period of time. This is a big no-go. Again, props to you for listening.

No worries at all, that is a very reasonable question to ask. As this is gambling, it is ultimately based on luck. These scripts are not meant as a long term solutions, and are not something I would rely upon to make money 24/7 however they do have a proven ability to make profit. I also include a lot of helpful tips upon purchase. I'd say the #1 piece of advice that I can give is that every time you are ahead by more than 1,000 bits, withdraw back down to your starting balance. Each script operates in a different way, for example Script #1 relies on a 1.02x multiplier giving it a 97.1% chance of winning, where as Script #3 relies on a 100x multiplier and will increase the bet by 3x every 100 rounds. While a 100x multiplier only gives the bet a 0.99% chance of winning, it will give you 100x profit upon a win. Statistically, you are not bound to win within the first 100 rounds. This is actually a good thing as the profits are the best at 300+ losses.

To break it down a little further:

Series 1 = 0-100 consecutive losses

Series 2 = 100-200 consecutive losses

Series 3 = 200-300 consecutive losses

series 4 = 300-400 consecutive losses

You loose 1 bit per bet in the first 100 rounds however if you win anywhere within that 100 rounds you will make a 99 bit profit. The only rounds that you will not make a profit is if you get a win on either the 99th or 100th round. Even then, you would either loose 1 or 2 bits respectively.

Assuming you have made it to 100+ consecutive losses, the bets are now 3bits/bet which equates to a 297 bit win. Seeing as you have lost 100 bits during the first round, you are still making a profit anywhere up until the 66th round. Anywhere between the 66-100th round and you are loosing again. Assuming you win on the 200th round, you are at a loss of 103 bits, bummer.

Assuming you have now made it to 200+ consecutive losses, this is where the profit begins to be made but are still not as profitable as 300+, seeing as the bets are now 9bits/bet, totaling a profit of 891bits/win. Any win within the first 55 rounds will be profitable.

Between 300-351 is the optimal spot to win, and statistically speaking seems to be where the majority of people make their profits. The ideal spot to win would be at 301 consecutive losses as the losses thus far would equate to 1,300bits and the profit would be 2,673/bit, meaning that overall you would be 1,373 bits ahead.

If you have managed to make it to 400+ consecutive losses, props to you. This is pretty uncommon and would mean that you have lost 4,000 bits so far, however with the bets now being 81bits/bet, you would make a win of 8,019 bits. This means that anywhere between 400-450 consecutive losses is still profitable.

To sum everything up, you want to win anywhere between 1-99 in series 1, 1-66 in series 2, 1-55 in series 3, and 1-51 in series 4.

With those numbers in mind, you have a 67.75% chance of making a profit. Even if you don't make

a profit but still win somewhere between 1-400 rounds, the most you would loose would be 1,327 bits(\$5.03). Statistically with a 0.99% chance of winning per round, it is unlikely that you hit 400+ consecutive losses but anything is possible. Please bear in mind that despite the odds, this is still gambling and anything is possible. I hope that the math/methods make a little more sense to you now. If you have any more questions please feel free to post here or shoot me a PM.

Additionally, i'll use TheVertexGuy as an example:

<https://bustadice.com/player/thevertexguy>

You can view his charts on bustadice, which show a graphic depicting what I am talking about. He has been using Script #3 alone and has managed to make a B 0.040265 profit in 5 days. He is one of the few people that actually followed all of the tips in my PDF, primarily withdrawing back down to your starting investment after making a profit of 1k bits or more.

I'm going to buy Script #3 from Shoppy but need to ask this first:

- 1) with an investment of 6000 bits how many times is it possible to make 1000 bits and withdraw per day?
- 2) from your experience have you ever lost the whole 6000 bits investment at any time?
- 3) does the script automatically places the bets by detecting your balance or do you have to manually insert it?

Thanks

It really depends on the person and how well they follow the instructions and tips. Some have managed to withdraw 50+ times for a total profit of .05 BTC(\$200).

It is possible to loose the entire 6k if the script manages to loose 500+ consecutive rounds. This is pretty highly unlikely and I always recommend stopping the script if it begins to loose more than you are comfortable with.

Everything is automatic. All you need to do is copy and paste the script in to the script tab.

If you look back a few pages you can find some vouches/reviews. For example, Thevertexguy has made \$250 with the script.

<https://bustadice.com/player/thevertexguy>

If you're on the edge with it you can always err on the side of caution and save your money. At the end of the day this is still gambling so anything is possible even if other people have had great success in the past.

Script #1 is the smallest betting script. You're looking at +/- 500 bits an hour. For the larger gains I'd recommend looking in to script #2-6.

Which one is the best to use for constant profit? I'm afraid that it will make profit couple times then just lose your whole bankroll?

(Jan 7, 2019 05:37 PM).Elysium. Wrote: [\[CITE\]](#) It really depends on the person and how well they follow the instructions and tips. Some have managed to withdraw 50+ times for a total profit of .05 BTC(\$200).

It is possible to loose the entire 6k if the script manages to loose 500+ consecutive rounds. This is pretty highly unlikely and I always recommend stopping the script if it begins to loose more than you are comfortable with.

Everything is automatic. All you need to do is copy and paste the script in to the script tab.
So it would have to lose 500+ times for you yo lose whole bankroll?

Read back through the thread, quite a few people have already reported their outcomes and scripts used. There are also some links to bustadice profiles to show the exact profits.

One example is Thevertexguy who is currently up over \$400.

<https://bustadice.com/player/thevertexguy>

The biggest key to making him successful is listening to the tips provided and not getting discouraged after a few small losses. The charts show that over time the scripts can be very successful if used correctly and following the tips provided. Another key factor is knowing when to stop for the day. You can always come back and play another day but inevitably if you leave the scripts running 24/7 you are bound to loose some. Long story short, be smart about it and you shouldn't have a problem.

TheVertexGuy - January 23, 2019, 2:06 am

So here goes my vouch for Script #3 (The only one I have tried).

As stated by @.Elysium. , I have managed to do a profit of 0.11253 BTC (\$400+) since 3rd of this month up to today as can be seen in my bustadice profile.

What I can suggest to those who are using this script or are interested on it is:

- Fix a daily limit of how much do you want to win, for example, my daily objective is to win 6000 or 7000 Bits while doing pauses and withdrawals every time I profit 1000+ bits. When I get my daily objective I call it a day and repeat again after 24 Hours.

- Atleast for me, what have worked better with this script is a bank of 30000 Bits instead of the 6000 Bits one suggested for Script #3. With that bank (30000) you can handle better the script if you want to go full no stop loss as in average you can go up to 570+ straight losses before you lose all your bank. In the time I have tried the script almost daily I managed to win 9 times a pretty nice quantity of bits between round 520 -560, where with a smaller bank I would have lost all before getting those tasty winners. (Starting from 400 straight losses the profit you can get from 1 winner here is bigger (So is the risk of losing all your bank), 1 time I got lucky enough to win at round 506 to get not only all losses covered but also a profit of 10000+ Bits)

Now, you can also use the script with a Bankroll of 6000 Bits, but you need to be more cautious on when to stop the script to avoid to losse the whole bank as with the 6000 bits bank you can handle like 400-450 losses (Don't remember well). If you losse 2000 bits of 6000 bits then its recommended to stop, wait some minutes and try again until you manage to end in profit.

- Don't forget this is gambling, there is a real risk you losse your whole bank (And yes, if you are pretty pretty pretty unlucky you can lost it all at the first tries before you manage to get some decent profit). In the 20 days I have tried the script I only lost my whole 30000 bank 3 times (You can manage to get 575+ straight losses if you get unlucky enough), but at the times that happened I already was in a profit of about 3x times that bank, so I just deposit 30000 again only from profit and

start again the next day with the same daily objectives (Forget about trying to recover your whole bank in only 1 day if you are using or going to use a 30000 bank like me, more are the chances you lose all of it again until you end with nothing. Instead keep doing the daily objective I suggest like nothing happened and try to get on track again slowly).

- Again, this is gambling, only use the money you can afford to lose as nothing is really sure here (As this also depends in your luck)

Based in what I said from a run of 20 straight days I tested the script, atm it shows profitable and atleast for me its fun to run it every day to try get some quick profit while I can.

If you accept the risk, go ahead and try this script :)

PD: I took an interesting hit today, but it wasn't because of this script. I wanted to try my luck and tried a pretty risky script (A different one not developed by the OP) and things didn't end well lol. I will do a pause from now so I will be less active, I'm happy with the amount of profit I got at the end and will start again after some time. I will keep recommending this script, GL to all!

BTC Script #5 (78fb8c0a-404e-4115-a2aa-a320648622a7)

My order details :)

Sirhofiio - January 31, 2019, 9:05 am

(Dec 7, 2018 12:12 AM).Elysium. Wrote: [\[CITE\]](#)

Please follow the links below to create an auto-buy contract.

Proof(Withdraw History from the past week):

Which script to choose:

If you want to play it safe while getting the hang of using these scripts, i'd recommend either script #5 or Script #1.

If you want to make significantly more profits than script #1 or #5 while still remaining relatively safe, i'd recommend script #3. Script #3 is my personal favorite.

If you want to make maximum profits while living on the edge, script #4 is the one for you.

Instructions on how to use:

Go to www.bustadice.com and register for an account.

Transfer initial investment to your bustadice account.

Select 'Play'

Click Script Tab

Copy and Paste the script provided

Start the script and monitor closely.

Recommended use:

Start with the recommended amount listed in the image. After increasing your profits, continue to withdraw in \$10-20 increments. While these scripts are excellent for gaining quick profits, they can and will drain your balance if left unattended. After playing a few times you should be able to easily withdraw all of your initial investment and continue playing with just your profits.

How to purchase:

Click the image and you will automatically be redirected to my Shoppy page. On Shoppy I only offer crypto payments. I will accept PayPal F&F from upgraded members ONLY. Please PM me and create a contract in order to purchase with PayPal.

FAQ:

Q: I have paid for the script and there was nothing instantly sent to me.

A: Because the payments made to Shoppy are using crypto payments you must allow time for 2 confirmations. This can take anywhere from 10-60 minutes under normal circumstances.

Q: I lost my investment... Why did this happen?

A: Bear in mind that you must follow the recommended investment for this script in order to see profits. 90% of cases where the people loose their investment is because they didn't follow the recommended investment. I have caught a few people lying about this and requesting a refund. Don't be an asshole. If you try and start with a lower than recommended investment, you will end up loosing it because the script doubles bets on a loss, meaning that it will cause a fluctuation in balance before winning and earning a big profit.

Final note: Please note that these scripts are gambling based. Because this is a digital item, there are no refunds.

If you have any issues with the scripts, I still encourage you to come talk with me before sales trashing or anything else. I am more than happy to help you out as I would prefer you have a positive experience while shopping with me.

1,000 bits is .001 BTC (\$8.72)

1 bit = \$0.08

Please follow the links below to create an auto-buy contract.

Proof(Withdraw History from the past week):

Which script to choose:

If you want to play it safe while getting the hang of using these scripts, i'd recommend either script #5 or Script #1.

If you want to make significantly more profits than script #1 or #5 while still remaining relatively safe, i'd recommend script #3. Script #3 is my personal favorite.

If you want to make maximum profits while living on the edge, script #4 is the one for you.

Instructions on how to use:

Go to www.bustadice.com and register for an account.

Transfer initial investment to your bustadice account.

Select 'Play'

Click Script Tab

Copy and Paste the script provided

Start the script and monitor closely.

Recommended use:

Start with the recommended amount listed in the image. After increasing your profits, continue to withdraw in \$10-20 increments. While these scripts are excellent for gaining quick profits, they can and will drain your balance if left unattended. After playing a few times you should be able to easily withdraw all of your initial investment and continue playing with just your profits.

How to purchase:

Click the image and you will automatically be redirected to post #2 of this thread. After a contract is created the auto-buy link will be shown.

FAQ:

Q: I have paid for the script and there was nothing instantly sent to me.

A: Because the payments made to Shoppy are using crypto payments you must allow time for 2 confirmations. This can take anywhere from 10-60 minutes under normal circumstances.

Q: I lost my investment... Why did this happen?

A: Bear in mind that you must follow the recommended investment for this script in order to see profits. 90% of cases where the people loose their investment is because they didn't follow the recommended investment. I have caught a few people lying about this and requesting a refund. Don't be an asshole. If you try and start with a lower than recommended investment, you will end up loosing it because the script doubles bets on a loss, meaning that it will cause a fluctuation in balance before winning and earning a big profit.

Final note: Please note that these scripts are gambling based. Because this is a digital item, there are no refunds.

If you have any issues with the scripts, I still encourage you to come talk with me before sales trashing or anything else. I am more than happy to help you out as I would prefer you have a positive experience while shopping with me.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
