Thread: [Fundamentaly undervalued stock analysis](#)

SIM-4051703 - December 7, 2018, 3:28 pm

Hey,
I've started a little "stock analysis project" you could call it.

It's basically me searching for undervalued and great stock opportunities and telling them to the people who have purchased the package. I've sold this product to a few people, and they said it has been a big bonus and they've learnt alot from it. (They're newcomers to the stockmarket)
I've been investing in the stock market and the crypto market for about 4 years now, And I can say, I've learnt really much. And I thought that I could sell this knowledge I've gotten through these years.

The site where the packages are:

I focus mostly on Europe stocks, Will list some US & Asian stocks aswell.

Our group chat will be on Discord.
You will be helped upon purchase with on boarding you.

Discord is an All-in-one voice and text chat that's free, secure, and works on both your desktop and phone, if you didn't know already.

Add me on my social media for more information:

[deleted]

Thanks, and peace! ?

Tried to add you on Discord, but it couldn't find your username apparently.

Hit me up.

also, could you confirm your overall P/L from past and current asset portfolios?

x

And what exactly is the method you use for determining the intrinsic value of the stock? What is your "fundementally undervalued stock analysis?"
