Thread: [Searching for a Spy App - Install App on a phone](#)

EdoFazlinovic - December 8, 2018, 2:54 am

Hi guyz!

I want to install a spy app on my girlfriend's phone (Android Samsung) because I believe she is cheating me (99.9% sure), but don't have any hard proofs yet coz she is pretty smart of hiding those stuff. Recently I googled some apps and saw a couple with interesting features and I want everything (all social messages, videos, live video, live photo, all photo), basically, spy app All-in-One. Which one do you recommend me?

I don't want to be with a gf who cheats and can be my wife one day so I want to end this quickly.

EDIT: I bought once a spy app 3 years ago for 5\$ a year via PayPal and it worked great, but I forgot its name. It was on Google Play and had 90k+ reviews. UI was red and white, not the best UI, but you had SMS GPS tracking and those kinda stuff.

Can she see this apk in her phone? I hope she can't and it's very good hidden.

Can she detect if I monitor her via this tool?

I bought this revcode pro for 1 year. Can you tell me steps, what i need to do?

I don't see anywhere on the thread or I missed something

Wait for your login details. They will be sent to you. When you have them you can log in, then go to client and build your new client. It will generate a APK inside a RAR file. Extract the APK and send to your target device. When then target installs they will appear in your connections list.

i have the app which dont require any port forwarding live video streaming screen shots live mobile screen call records and much more features messenger whatsapp imo twitter which is free pm me

77spy - April 27, 2019, 12:46 am

Is there a good program for iPhone too? Thx!

vastapap - April 29, 2019, 12:41 pm

There is Any App Spy for iPhone?

Mystyrein - June 20, 2019, 4:14 am

I have 2 grand daughter ages 9 and 10. They want cell phones ...with after school activities. They do need phones in case they need to be picked up early . On the other hand some of their friends have cell phones and do some very sneaky bad things. 1 little kid was looking at porn. So I am wanting to install on their phones that they wont see or know about that monitors texting and chats like Facebook or snap chat ..kik etc. I seen one you have to pay a monthly service ...if you can help me I would appreciate it. I just want to keep them safe.

Johnson94 - June 26, 2019, 9:37 pm

Cocospy is the best app for text monitoring. Cocospy gives you access to all the commonly used chatting apps. This includes WhatsApp, FB Messenger, Snapchat, Instagram and Viber.

PrinceOfTruth - June 28, 2019, 7:11 am

If you're that sure, just break up with her now. You don't need that extra 0.1%.

Kvietys - July 11, 2019, 1:24 pm

Nice thread, might be handy in future. As you never know what can happen

DAL-SHA - October 1, 2025, 11:00 pm

Any RAT (Remote access tool) will work , just like CraxRAT or any other RAT..

Hsdttf x - October 2, 2025, 5:41 pm

I got a pretty good one that works on both Android and IOS. Send a PM or convo
