Thread: [Smoked weed and then a cigarette](#)

Goku???? - December 8, 2018, 6:00 am

I've had mixed feedback on this.

It was at University, I thought I'd hit a blunt and about 10 minutes later I just had a cigarette. For some odd reason, I couldn't stand/walk properly and ended up looking like a retard hugging the wall to guide myself around for a good 3 minutes.

Are these 2 mixes not good for each other?

Dr. Anonymous - December 8, 2018, 6:09 am

Well i always believed, as i've heard it many times. If you smoke a joint, and then a cigarette your high supposedly be better.

Today i smoke weed everyday, and honestly the cigarette thingy is only working if you're not rutinated smoker.

most people doing it both . even once done weed with shisha

reBELLYus - December 9, 2018, 1:38 pm

Try to stay away from the cigs. You will live longer.

V3N0M - December 9, 2018, 1:48 pm

Thats the only way tabacco seals that weed stuff in.

Sheep - December 9, 2018, 1:49 pm

They call it smoking darts here when you roll your weed with your cigarettes. Pretty normal.

Sounds quite interesting actually. Does it give it a better effect?

I'm not sure, I've never done it. I know it's supposed to be quite bad for you compared to just smoking weed.

SIM-82498 - December 9, 2018, 8:28 pm

I almost always smoke a cigarette after a blunt.. I don't go losing my balance however. Do you smoke either cigarettes or weed often?

Musquito - December 9, 2018, 9:14 pm

It's quite common in europe that they mix tobacco with weed. Maybe there is a reason behind it.

I usually only smoke cigarettes

random123123 - December 10, 2018, 11:58 am

Seems interesting, will try one day :P

Haha! Same here bro :)

Machos - December 11, 2018, 6:50 am

I think the weed bring down your blood sugar, and the cigarette caused less oxygen in your brain.. which gave you the feel of being in need of finding support from a wall..

Also the realisation of feeling weak on your legs could make it even worse.

F.B.I - December 11, 2018, 3:26 pm

Tobacco grosses me out when high on weed. I do like a cigarette on benzos though.

Yeah, weed prices are insane and we are poor. Smoking it with tobacco makes the weed last longer.

AuthKils - December 12, 2018, 4:54 am

I always smoke weed with tobacco and I smoke like 4 times a day.

Effexion - December 12, 2018, 4:56 am

Ugh, I hate this. Always makes me feel ill. It can pick up the high a little though.

Not because we are poor, but because it burns better. I am talking about hashish.

Yes we do sometimes use tobacco mixed with green, that ain't so bad neither, as long it's a good mixture.

Yeah, I smoke hash and always use tobacco but I use it for green too. It's true what you say about the burn but it is also cost-effective.

It's a cheaper alternative and burns better.

PerfectStorm - December 12, 2018, 6:02 am

try mixing the two and see what happens

It burns faster that is why.

Dan. - December 12, 2018, 3:31 pm

When I used to smoke it was almost ritual to smoke at least one cig after the pot.

I agree, it will only affect if you're not a regular smoker.

Cyadrogen - December 12, 2018, 3:52 pm

No but it sounds like you dont smoke cigs that often. The first time it feels like that (at least it did for me).

KillTheNoise - December 12, 2018, 5:20 pm

Usually you mix your weed with tobacco to give it flavor plus nicotine makes you light-headed if you took a big hit it will make you very light-headed

BBSimmons - December 12, 2018, 9:09 pm

Weed makes a nicotine rush a lot more intense.

Honestly fuck cigs tho I only smoke woods or cones with just green.

CarbonBasedHax - December 12, 2018, 9:38 pm

Yeehaxor1337 - December 13, 2018, 12:11 pm

i know that nicotine destroys a little bit the effect of the THC

MAST3RM1ND19 - December 16, 2018, 4:33 am

Hahaha nah man it's the nicotine that gives you the extra headpin

I loved punching veggies straight after a blunt I'd smoke it in 1 minute flat

Flexibility - December 17, 2018, 11:57 am

Are you fucking asking are cigarettes good?
Just smoke weed and stop smoking shitty cigarettes and u will be fine

i still dont get ur question like wtf

yh its called a spliff when you mix them its perfectly fine you just cant handle weed xD

brownifuls - January 5, 2019, 7:49 pm

Well certain people react certain ways to nicotine after being stoned. Me personally it makes me more chill and calm.

Prognostic - January 6, 2019, 8:05 pm

I know some people who does 50s, half weed half tobacco out of bongs.

Heard it's horrible for you.

7/3 and i taste too much tobacco, i like 7/4

like 0.7gram tobacco, and 0.4 hash. 7/3 i do for bong :)

The Reall question u should be asking is how high is your tolerance?

Depends what flavour tobacco ect..

I prefer the classic way bong,vaporiser is only when i go coffeeshops

I'd also recommend rolling it reversible that way you can taste the bud more

Dope - January 12, 2019, 7:24 am

It should intensify the experience whenever you have some kind of drug and then smoke a cig.

Americanrussian5o - January 12, 2019, 12:06 pm

sounds like you had a nicotine buzz after that hit of tha join. ? ? ?
