Thread: [\[CRYPTOAPI.NEWS\] FETCH RECENT NEWS | BUILD AUTO PILOT NEWS WEBSITE](#)

Dr.Exploit - December 8, 2018, 6:03 am

What is Cryptoapi.news?

It's a project that allows API for developers to build auto-pilot news websites and other kinds of products.

It's still an ongoing development but i made available already the first REST API function that enables you to retrieve the 10 latest news, it is constantly updating as the source updates its website.

What sources is the service getting news from?

- Coindesk
- Cointelegraph (In Development)
- Bitcoin News (In Development)

What can i do with this ?

You can build an auto-pilot news website, which means it will add content to it automatically from different sources leaving you to do completely nothing.

Will you release an auto-pilot news CMS?

It's in development as we speak, we will release an auto-pilot news CMS that will enable you to do what i just mentioned above.

Are you developing more products in future?

Yes for sure, we already released an free crypto exchange software that is available at <https://cryptoexchange-software.us>

AI News Sentiment Analyses

Released a new api call that will retrieve you the daily market sentiment based on news, this is using machine learning and accuracy on results as been proven, you can check this now:

PHP Code

<?php

<https://cryptoapi.news/api/v1/free/sentiment>

WEBSITE : <https://cryptoapi.news/>

Github : <https://github.com/GMX9/Crypto-Api-News> (For developers, class already made)

Please leave your feedback ! ?

skull - December 9, 2018, 3:42 am

I would like to request some more data if possible, first it would be pretty nice if there could be a property on the API for the coins the article is related to.

I already added an option to specify the coin, added also more coins to supported list. Now ETH,BTC,XRM,LTC are supported:

<https://cryptoapi.news/api/free/last10News/all>
?

I would suggest to change the api to the following request format:

Code /api/{api_secret}/News/{coin}/{pageCount}
{pageCount} : max=10 min=1 default=10you should also parse the dates so you don't send different formats.
parse it like this : DD.MM.YYYY HH:mm:ss

SIM-2593966 - December 9, 2018, 4:43 pm

You should look into the JSON responses that are generated by the server. It seems like the articles are not separated in some sort of array, which makes parsing data from the api harder.

At my side the Results are placed into an Array, what do you mean ?

edit: op solved it

parse it like this : DD.MM.YYYY HH:mm:ss

Yes im launching today an update related with dates, i was fetching them from original sources, but im working in a date converter that will be all the same, and ill apply to all news.

Regarding the page count its a good suggestion, ill make a param for it, but ill also limit the requests for the free api to 10 recent news so i can launch later a paid api with more options.

(Dec 10, 2018 07:43 AM)Abruptum Wrote: [\[CITE\]](#) At my side the Results are placed into an Array, what do you mean ?

Updated now the api request format:

PHP Code

```
<?php
```

<https://cryptoapi.news/api/free/lastnews/all/10>

Ill update the date asap ?

:) you are fast, i would also suggest that you implement a version count like this :

Code <https://cryptoapi.news/api/{version}/free/lastnews/all/10> so if somebody is using your current api they can continue using it while you are creating newer versions :)

Dr.Exploit - December 10, 2018, 1:21 pm

What a great suggestion ! added now !

PHP Code

```
<?php
```

<https://cryptoapi.news/api/v1/free/lastnews/all/10>

?

CCN news source added successfully, counting now 3 sources !
