Thread: [Can anyone check this file for virus? Im panaroid](#)

kirmacoea - December 8, 2018, 5:59 pm

Hello guys,

Yesterday i downloaded zip file, its was a video. I extracted file but nothing opned. I copy that file in to my usb . Thats all i did. But when i tried to delete extracted folder from my pc, i got ask admin rights to delete that folder.

When i click it, all file deleted.

Now im afriaid about , when extracting that zip file may be i got auto installed virus or something like that. I dont know much about that. So can you guys help me on this ?

The file I downloaded was

[https :// openload. co/f/h6_iFiDE2Fg/](https://openload.co/f/h6_iFiDE2Fg/)

If any expert can check that file have virus or malware, please check and let me know here ?

Im panaroid atm.

Have you tried scanning the .zip / it's contents on different AVs?

kirmacoea - December 8, 2018, 6:08 pm

zip file once downloaded. Nothing detected

Try alternatives. Online scan too... Virus Total, Norton, McAfee etc if nothing. Try more private scanners

here's what you do. go to <https://virustotal.com> and upload it. it gets scanned by 60 something antivirus products. then go to <https://app.sandbox.com> and make a quick account. the site uses an AI malware analysis program to analyze the file. granted, it could still be malware. but there's a much lower chance.

^ exactly.. obv sh4moon handled that easier but yh,, ? ?

kirmacoea - December 8, 2018, 6:21 pm

Ok will try that out. Fogot to mention, once extracted zip file it had another zip file. That one had the video.. so its double extracted zip file.

Anyway i will follow all infomations. Thanks so much at least reply that much fast. I have to wait until my internet get fix. My line down too

realsunjester - December 8, 2018, 6:26 pm

458mb? jesus, use <http://spyralscanner.net>

kirmacoea - December 8, 2018, 6:35 pm

I just notice virustotal and SNDBOX cannot upload that 458 mb file.

I will use your link once my internet up.

Just one question, if its have a virus and it's totally fud, how can i know it ?

.Astro - December 12, 2018, 4:40 pm

Why not just run it on Sandboxie or another sandbox program?

VoIPv2 - December 12, 2018, 4:55 pm

<https://www.virustotal.com/en/domain/openload.co/information/> that website in itself seems to be very sketchy anyways.

A google search shows that the first thing is: "Openload.co Virus" Probably want run a scan on your computer to be same because zip has a exploit within it which can unzip content from outside the resource directory.
