Thread: [INTX HTTP BOTNET | ADVANCED REMOTE SYSTEM | RECOVER BROWSERS | BOTKILLER | And MORE...](#)

RCE - December 9, 2018, 2:08 pm

IntX HTTP Botnet

Note: New Auto buy link has been added, for support pm here or add my contact, thread is closed because we want to write updates only, but the sales are still open !

What is IntX Botnet?

-IntX Botnet is a professionally coded remote administration tool for windows written with the power of C# with stable communication.

What makes IntX Botnet different than others?

-IntX Botnet has a wide functionality to give you the maximum advantage of the bots with implementing an Auto-profit cryptosystem to make you able to make money during using the botnet.

What is Auto-profit cryptosystem System?

-It's all about WJ ,WJ is a module implemented in the botnet working hidden in the background of the client's computers, what it does is like a simulate of the mining process but in a different method, and the add-on in the panel will monitor the amount of your BTC and it will be updated dynamically when a new profit is coming.

Features:-In-depth Bots details.

-Secure C&C panel wrote in PHP.

-Self-Protected Panel.

-On Connect task (New clients will execute task/s).

-Low resource usage.

-Firewall bypass.

-Supports both x86 and x64 Windows OS (from XP to 10).

-Anti-Emulation.

-Anti-Debug.

-Advanced task management system.

-Captcha on the login page to prevent brute force attacks.

- Download & Execute (Supports both HTTP and HTTPS links).
- Download & Execute (RunPE).
- Download & Execute (Arguments).
- Visit webpage(hidden).
- Visit webpage(Visible).
- Self-Shield protection.
- Bot Killer.
- Download Logs from Panel.
- Recover passwords from browsers.
- Recover Auto Complete Forms from browsers.
- Recover Files on system (.txt,.doc,.docm..etc).
- Recover Cookies from browsers.
- Dynamic Random connection to a panel(Avoid Runtime Detection).
- Nearly FUD.
- Startup.
- Update.
- Uninstall.

I'm know shit from botnet will you offer your botnet for a vouch. It will be honest. But cause i know shit about botnet and code, if i found any suspicious stuff or good i will write it

Let me know

Hero - December 10, 2018, 8:36 am

Damn, i will definetly hit you up once i got the funds to purchase this. Looks HQ and solid.

I hope you will have good sales :)

Uncrafted777 - December 10, 2018, 9:38 am

PM me your Jabber please.

RCE - December 10, 2018, 9:45 am

Thanks for your reviews guys, I've sent a vouch copy so no copies are available now.

AlphaIndustries - December 10, 2018, 10:14 am

will wait on the person that receivec the vouch copy to leave a reply here, interested.

RascalPascal - December 11, 2018, 10:32 am

(Dec 11, 2018 11:06 AM)Fictional Wrote: [\[CITE\]](#) Panel looks like a zyklon clone?

It just use the same html template as Zyklon but in fact its LiteHTTP clone. LiteHTTP is open source and its coded in C# just like this one.

LiteHTTP

Spoiler [\(Click to View\)](#)

RCE - December 11, 2018, 10:37 am

@RascalPascal,@Fictional, it doesnt matter which panel is this , the botnet totally is different than both.

3DES - December 12, 2018, 4:14 am

How does this "firewall bypass" work?

Do you evade hooks in injection winapis, if so how?

Why are many of the features in the list directly taken from Parasite HTTPs thread?

RCE - December 12, 2018, 4:21 am

Update:

A new update will be released in a few days and will inform all the current customers.

time wasters please stay away from here.

NYANxCAT - December 12, 2018, 2:11 pm

Good luck in sales bro and I know that you tried to make this a better version of litehttp by adding some features but you still should credit Zettabit.

RCE - December 12, 2018, 2:45 pm

I would also want to know this? Using netsh to create a new firewall rule should not be considered as firewall bypass plus it need administrator permissions to add firewall rules.

What does "Self-protected panel" mean?

You are using LiteHTTP panel but you have not credited the original author anywhere.

RCE - December 15, 2018, 10:04 am

@El Lobo , i'm not using netsh to add the software into firewall rules, i said i use an efficient method like that

also self-protected mean it prevents unwanted people from login into the panel plus preventing bots from search engine from crawling or analyzing the pages.

for your last statement, it's not your case if I give the credit to the author or not, u are allowed only to ask question's related to the botnet nothing else.

ShalomAlCapa - December 15, 2018, 2:47 pm

Looks awesome man GLWS ! ?

RCE - December 15, 2018, 10:39 pm

(Dec 15, 2018 03:47 PM)ShalomAlCapa Wrote: [\[CITE\]](#) Give me a time estimate of how long its gonna be Active on Client end.This is client based not based on the actual botnet's, so it will be last for a longer time if u do a botkill each period to keep the client's machines clean from other malwares, also using a decent crypter will higher the chance of keeping it active without losing the clients.

(Dec 15, 2018 04:07 PM)G0dzSoldiers Wrote: [\[CITE\]](#) Looks awesome man GLWS ! ?Thanks ?

Zettabit - December 16, 2018, 2:09 am

Send me an unencrypted stub and panel, because from the looks of your screenshots and feature list, 95% of this bot is my code base, and I did not give you permission to use it and sell it.

RCE - December 16, 2018, 3:22 am

@Zettabit, the panel is open source and the entire code of stub is totally different than your's, the panel that i developed has a lot of fixes with new features and a newly implemented crypto-system. please, next time there is an option called 'Private package' in sharing center so if you prefer to keep your code private simply use that option.

Zettabit - December 16, 2018, 2:15 pm

(Dec 16, 2018 04:22 AM)Shad0Byte Wrote: [\[CITE\]](#) @Zettabit, the panel is open source and the entire code of stub is totally different than your's, the panel that i developed has a lot of fixes with new features and a newly implemented crypto-system. please, next time there is an option called 'Private package' in sharing center so if you prefer to keep your code private simply use that option. Yet your thread says entirely different. My thread clearly states that if you use my source, it is not allowed to be sold in any form, modified or not. 'Fixes' is not an entirely different panel, as it looks 99% the same as my panel. As for the 'open source panel' statement, that doesn't mean you can use other peoples work and take credit for it.

EDIT: I expect a PM from you regarding this, otherwise I will be opening a community alert.

RCE - December 16, 2018, 9:41 pm

Update:

- Fixing some bugs.
- Adding more browser recovery.
- Removing useless timing method.

Opheus - December 17, 2018, 6:57 am

do you give builder ? or just the panel files and bin?

RCE - December 17, 2018, 6:58 am

(Dec 17, 2018 07:57 AM)Opheus Wrote: [\[CITE\]](#) do you give builder ? or just the panel files and bin?
I didn't coded a builder yet , so atm it's just panel and bin.

Regards.
