I have a question!
Please post directly below.

Investment?
No major investment required!

With Elite and Gold packages, when will the slaves be delivered?
Generally within two hours.

Are these methods saturated?
No. These are private methods. They are absolutely guaranteed to bring results.

For clarification, what is this product going to help me with?
This product includes our private techniques to spread your file to a massive audience and private methods to monetize the bots. We have personally made six figures with these methods.

Setup time?
Setup time should not take very long, however you can always put more work in for better results.

Does the monetization method include...
No ads, surveys, silent mining or any public method. You will not guess it. It is 100% private and has proven it's immense success.

What are criteria for refund in the elite package? Will stub have updates or is it one time? How much woll the 50 slaves roughly generate?
