Sportsbet.io is okie ... But no longer accept instant deposit..

ucplusx - February 26, 2019, 6:42 am

I don't find any betting sites that accept deposit BTC instant so far, not yet checking Sportsbet.io.

But for me, if you want to go jump betting, just place your money on safe dealer such as Bet365

A quick and DISAPPOINTING feedback from 1xbet.:

After making a certain profit (100eur -->1200eur) I withdrew 400eur. After that they closed my account without any explanation.

I tried to log in but it does not let me in. After I contacted with security department they sent me this email:

"We want to inform you, that our company decided to stop any collaboration with you (closing your account). The decision was made after a careful investigation of the situation by our security service. The decision is based on a violation of the Terms and Conditions."

800 eur stucked in the account... An other experience with 22bet which is their clone site. I lost 500 eur there with the same way...

I DO NOT SUGGEST to use 1xbet group's sites!!!
