Wow nice idea, so let me get this straight , this sends commands to your botnet?

nofear1999 - August 5, 2010, 3:08 pm

I junked old thread which had vouches and shit because whenever someone posted it didn't get moved to first page so I don't know what the hell was happening there.

Yes and this has been out longer than any other booter. (twBooter came out after mine actually not V2 but after V1) This is one of the original booters and it's survived this far. I hope it to survive for a long time.

tedelelex06 - August 5, 2010, 7:20 pm

whats the max time i'd be allowed to hit a server with it? is it limited to 3mins or?

nofear1999 - August 5, 2010, 8:43 pm

It's limited to 2 minutes (default value for most booters)

Yin Yang - August 5, 2010, 9:00 pm

Can't wait for the updated version! Make sure to PM it to me when released.

FaZe Rebirth - August 5, 2010, 9:34 pm

Make one? (no cc needed)

nofear1999 - August 6, 2010, 3:53 pm

I had a LR but I couldn't find a way to transfer it to my PP.

PlickaMaterna - August 7, 2010, 1:55 am

Vouch, sent \$20 and 2 minutes later I was ready to boot.

This guy is very polite and ready to help. Thank you very much.

EDIT: I just DDoSed myself (!) just to check if it is working, it killed my 4Mbits in like 3 seconds

Tyranasaurus SeX - August 7, 2010, 10:40 am

Vouch. Nofear is an excellent coder and after using his first version of DosBox i can honestly tell you that this booter will have plenty of power for the DDoSing enthusiasts. Goodluck with the sales. ?

nofear1999 - August 7, 2010, 5:12 pm

Thanks for all the vouches. I haven't had any unhappy customers. Buy it now. Real cheap, 1 year license it's the strongest booter taking down SANTREX. Try hitting down Santrex with your booter.

You use an HTTP botnet for this correct? Just wondering this looks good.

IRC running through a Hub.

Edit: Is it a private bot that you coded or public IRC bot?

nofear1999 - August 7, 2010, 5:30 pm

Zerex modded by myself. It's C++ so it's a shitty mod but the DDoSing is amazing. It's also stable as hell.

Atleast you tell the truth about what bot you use ? good luck with your sales again this is a very unique idea in replacement of a shell booter or if someone is to lazy to make there own botnet.

Yin Yang - August 7, 2010, 5:59 pm

I still need the updated version! I'm trying to contact you over MSN, but you're not replying.

nofear1999 - August 7, 2010, 6:48 pm

I haven't recived your msg. Also I'm working on installing a hub for shells. Just need a cheap ass VPS xD

The power of 2 great booters combined...

I'm setting up a Java Driveby to spread on some pedos. My neck is also fucked up. I slept on it wrong and the muscles have been fucked up.

I'm too young for muscle relaxers so I've been popping 3 advils a day + sitting in jacuzzi, sleeping with heatpads. Sorry for the inconvenience. It should be stronger soon.

Grimlock - August 16, 2010, 9:11 am
