Thread: [Yahoo can't extract emails from Facebook](#)

**dominant691** - December 13, 2018, 11:28 am

I hope i post this in the right section if not please move it.

Months ago it was posible to use yahoo mail to extract the emails of all of my Facebook friends now the option don't work (probably cause all of the recent scandals whit facebook). Is there any other soluton, any other way to do the same thing, getting the emails of most of the people in the friend list.

Sad, i searched and i didn't find solution asking here was my last idea, thank you for the respons. One more question, couple times there were news of hackers getting milions of emails addreses of FB users are these addreses uploaded somewere on the net? Sorry for my shity English not my first language.
