HUGE VOUCH !!!

Are you looking for skills? or are you looking for knowledge? or wait are you looking for someone who would be motivated af to go beyond the limits and makes you a lit af design until you're satisfied? damn you're at the right place.

This guy is awesome, completed the design within 24 hours and at such a cheap price, I can't believe the level of hardwork he put into this, and he doesn't take much time to make changes, he surely knows his shit. Did I mention he also provides you the PSD file? and the way he talks saying sir in every other sentence, he knows how to manage customers, manners=perfection.

here is the thread design he made for me: <https://hackforums.net/showthread.php?tid=5919387>
I have some pretty sweet sales because of him, would be returning for my other thread, it needs one lit af design too :3
