So I make music and have been working on my new album, what do you guys think of the cover?

Very cool cover art! The logo looks like is a print on the shirt at first sight. I'd love to see how it looks with some intense color(maybe purple). Only where's already color (orange/saturated parts). And of course, a parental advisory tag to add the final touch ?

Meh.. Using two dramatically different fonts like this is a big no no in design.
