Thread: [\[Bug Report\] Root Donations](#)

Leroy Jethro Gibbs - December 14, 2018, 12:09 pm

So I just came back after 6 months to actually be happy with the changes.

I also noticed I didn't have the new "root" userbar on my profile. So today I went to actually upgrade to ensure all the features I could get were available so I know i'm not missing out and it says I'm already apart of the "Root" usergroup.

Am I just missing something that was said prior or is this an actual bug?

xDowwdeen - December 14, 2018, 12:18 pm

As you are UB3R you are unable to upgrade to R00T, they have the same privileges

-xDowwdeen

Elitas - December 14, 2018, 12:25 pm

They don't actually have the same privileges, but you're still not allowed to become R00T if you're already an UB3R.

What is the difference?

You can learn more about R00t here:

So to clarify UB3R will have the same perms as ROOT. So its a refresh of UB3R.

They used to be able to see bans.php but Riyu messed something up and now no one can see that.

No.

ROOT can make lotteries and there are plans for some more features in the future which MAY be ROOT specific.

What was discussion, why are ub3r members limited in this story?

Leroy Jethro Gibbs - December 14, 2018, 2:34 pm

I think ub3rs and r00t should be equal since they are highest paid acc's.

Leroy Jethro Gibbs - December 14, 2018, 2:39 pm

I agree. Or at least have the option for UB3R's to purchase ROOT. Because I legit was curious why I couldn't buy it.

I think there is no option cuz ub3r and r00t are the same groups by most of features except bytes related ones which should be granted to both groups.

This. Im guessing it simply means that you cant use r00t. Because your current user groups.

Well I won't bitch and complain about it anymore. I'mma let Omni do as he pleases. Saves me \$50 lmao.

I appreciate all the responses guys! Gonna close the thread now as its not really a bug.
