Have a question? Check out the FAQ.

What consoles does the service work for?:

You can receive V-Bucks on either Xbox, PC, Mobile, or PS4. Works on ALL Platforms!

Is your method private and no bans?:

Does a bear shit in the woods?

What are your prices?:

7,500 vbucks for \$40

13,500 vbucks for \$50

27,000 vbucks for \$100

40,500 vbucks for \$140

Can do higher amounts

What payment methods are accepted?:

Bitcoin, Venmo, Zelle Pay (Chase Quickpay), ASK ME ANY OTHERS! Paypal is rarely accepted.

What happens if I chargeback?:

As all vbucks are purchased from my personal banking, I will report the transaction as fraud and will result in your Epic account getting banned

Why is PayPal not accepted? Why can't you just make a new Paypal?:

My PayPal has been permanently limited which is why I can not accept Paypal. Creating a new PayPal will only make my history worse with them, and I will get instantly limited. However, I do accept Venmo as an alternative to PayPal until I get PayPal back up and running.

How long does the process take after you receive the payment?:

After receiving your payment, I get started on it RIGHT AWAY. It will not take any longer than 15-20 minutes. If anything happens where I can not add vbucks to your account at the time, I will refund you 100%.

Are you still doing this service and do you need any more vouches?

You should probably update your prices as 50\$ for 13k vbucks is too much as elterco sells for 40\$ and he is no.1 hf vbucks merchant.
