Thread: [bitcrash.us | Faucet every 5 Minutes | Gambling Crash Game](#)

alibag - December 15, 2018, 2:03 pm

bitcrash.us

a BTC crash site with the bonus.

Unlike the current Bustabit with a flat 1% house edge bitcrash.us has added back the bonus meaning the house edge is now able to go lower than 1%.

The site uses the familiar denomination called "bits" you should be familiar with them 1,000,000 bits is equal to 1 bitcoin.

These buttons will assist you in quickly adjusting your bet sizing on the go.

bitcrash.us has only recently opened but now is the perfect time to take your spot on the leader board and make a name for yourself.

How to Play?

If your new to these type of crash gambling games I will explain it for you.

1- Claim 1 free bit every 5 minutes, so you can always play for fun and without commitment!

2- Deposit BTC. (If your wallet is for another currency, you can use the changer.com to immediately change the currency and send it directly to your deposit address in your account page.)

3- You set your bet amount in the box provided and click "Place Bet". If a game is already ongoing wait for it to crash and a timer will show up and wait.

4- Then you will notice a chart slowly climbing up, you will be given the option to cash out at anytime.

With all of that explained you should have the gist of how to play on the website and you should find it quite amusing. Hope to see you on bitcrash.us

You are able to verify the crashes via the fiddle located here
jsfiddle.net/rzo1qu8h/1/embedded/result/

Your guide on how to play, is not giving that much information over the "playing" part.

I stil dont understand a thing over what this site is supposed to do or what game i'm going to play.
