Thread: [Any success with CPA on Twitter? Can I promote offers through DMs?](#)

DoxM3 - December 15, 2018, 4:13 pm

I'm very experienced with targeting audiences and growing pages based around anything, I'm working with someone now and promoting some of his offers for a commission but I want to make my own money on the side. I have auto dms set up on the 8 twitters I have at the moment with a bit.ly [WARNING: potentially infected] link redirecting to the offer. Will this send? What are some other ways to promote offers?

At the moment I'm only on CPABuild but I asked someone with OGAds about joining and I probably will. My problem is finding the right offers to promote, I think my next move is to start doing Instagram seeing as I have followliker and all of that I will just need proxies.

I have no idea about twitter... I always wanted to try Auto DM thing but never proceeded with it because it will take some time.

Last year I worked on 4 websites and SEO and that was enough for a student like me for whole year. Easy \$200 per month for just 4 website setup and spending overall \$50-\$100 on each website.

Right now I am on new website which I will be building according to new things I learned about SEO and keeping Google changes over an year in concern. Might post journey thread soon as soon as I see some progress.

But in the future I would like to go into more methods so if you master twitter method maybe we can exchange our methods.

As for my suggestions please don't promote direct offer links make a CUSTOM I REPEAT CUSTOM LP not mass used LPs and then from there I use MobileDetect library to separately target mobile and desktop traffic.

And don't bother with mass Instagram Botting.... Its dead. Botting with big accounts is the new way.
