Thread: [Downloading File From Dropbox Makes It Corrupted And Unusable | VB.NET](#)

TerminallyIII - December 15, 2018, 7:04 pm

Trying to download an executable from Dropbox, but I when I fetch and try to run the file it says it is corrupted.

Here's what I use to fetch the file

```
Dim xHttp: Set xHttp = CreateObject("Microsoft.XMLHTTP")
Dim bStrm: Set bStrm = CreateObject("Adodb.Stream")
xHttp.Open "GET", "dropbox.com/s/xdlv1k61qcsvqzp/test.exe?dl=1, False"
xHttp.Send
```

Any help?

Fairly sure Dropbox doesn't allow direct download

Dark Spider - December 16, 2018, 12:14 am

Better you use a normal webhost to download, but,
i think i have the same problem xD

I will download 9hits viewer and run it on my botnet but my problem is the Tray icon in windows.

Any Ideas how i can Hide it?

NYANxCAT - December 16, 2018, 3:22 am

Dropbox doesn't allow direct link download, use <https://uploadexe.com/>

gigajew - December 16, 2018, 6:56 am

Also unless you're using https and everything is encrypted, I'd suggest just storing it locally in the executable.

I reckon this can actually still be done, but why are you using VB6? VB6 will not handle SSL versions less than SSLV2 unless someone has created a new activeX library with SSL3 support etc since my days using VB6.
