I can take a vouch crypt, can you pm me? I'll crypt a native net and use your startup method

SwatnetOughtnet - December 16, 2018, 1:22 pm

Include average stub size.

NYANxCAT - December 16, 2018, 2:09 pm

Nice product but I'm waiting for some HQ members to confirm that it's FUD run-time.

Good luck in sales bro.

Hi

You use jabber ?
please give it .. i am interested

3DES - December 17, 2018, 1:16 am

Post runtime scan on dyncheck with largest time limit & internet ON. What type of injection are you using?

Heya, I have Wickr if your interested in a more secure platform to talk on? Let me list my Secure IM's below, but be warned I'm not that active on them!

Jabber/XMPP: SploitEXE@exploit.im
Wickr: sploitexe

If you going to contact me on XMPP I Personally Prefer using it with PGP and OTR encryption and I personally use "SJ IM" to encrypt my messages!
Thanks for being interested in my service!

Hi, please don't escapes to the question and answer to him.

PS : i want to know which method of unhooking is used (all methods are public but maybe modded so don't tel me it's fully private).

GLWS ?

Hey Mate! Sorry I didnt mean to avoid the question, I'm just very busy at the moment and though I would answer the most important ones first! Also the Ring-3 Unhook method is a fully private. Coded from ground up by myself, with a polymorphic encryption over the top. I wont go into detail but it is fully FUD! Also to answer 3DES's question.

(Dec 17, 2018 02:16 AM)3DES Wrote: [\[CITE\]](#) Post runtime scan on dyncheck with largest time limit & internet ON. What type of injection are you using?I use self injection and I do not have DynCheck at the moment, but feel free to buy my service and scan on there at your own risk of distributing your file.

Yep! \$100 for 3 Completely Unique FUD Run Time Crypts! All with a completely separate private stub, sold to only the buyer and no one else!

<!-- My Jabber/XMPP is currently not working!! Please Contact me on Skype, Email, Wicker or PM's to purchase!! I'm trying to fix ASAP -->

Thanks for being interested in my service! Also in the PM I sent you last time, that was when it was in stage 1, since the prices went up in stage 2 I thought I would include a fully private stub with every crypt! Also, its not the crypter itself. I manually crypt your amount of files you purchase, via whatever IM use use, and send you back the crypted file within an hour of starting. As I said in my thread all crypts are done by hand, and that's not a selling point, it manually takes me 1 hour to crypt your file! That's why this service is HQ, unlike some other crypter's on the market ?

P.S. Just to say it again, all crypts are fully unique, even if you crypt the same file twice!

Why would a crypter have ring-3, new level of stupid? HF you funny.

Can you post a runtime scan please, or can I send you a file and you send me the scan?
