Thread: [Country Code Lock Back](#)

Omniscient - December 17, 2018, 7:03 pm

<https://hackforums.net/cclock.php>

This is a feature I disabled due to issues with IPv6 and inaccurate Geo IP locating. Our GEO IP now uses an excellent API and is very accurate now.

I have set CCLOCK for all upgraded members (L33t, 3p1c,R00t, and Ub3r). The link is on the Extras page and the upgrade page reflects the ability to get the feature.

Also added is CCLOCK data to Trust Scan. So TS will show if you have it activated.

I do recommend members use this feature. Gauth is amazing but this simple extra layer just adds that nice touch.

Thank you.

V For Vendetta - December 17, 2018, 7:05 pm

Is there any way to reset CClock or is it permanent once it's done? I plan to move in a few years and wouldn't want to lock my account.

Just enabled it, thank you :)

B?ker - December 17, 2018, 7:09 pm

Curious what API you use for? Good to hear that it's accurate.

Biggy - December 17, 2018, 7:10 pm

I'd enable it if I didn't make frequent trips to Canada.

Nonetheless, nice feature.

Pyro - December 17, 2018, 7:25 pm

enabled country lock cause i wont change my country anytime soon. Glad u can undo this too

SUI-3183372 - December 17, 2018, 7:31 pm

I see no reason not to use it if you're not trying to remain ultra-anonymous.

Evanescence - December 17, 2018, 7:35 pm

Alright. Thanks for enabling.

In which case this is probably the wrong forum for you.

I see the us is the option I have. It's just too bad the US is too far away from me.

DOG - December 17, 2018, 10:16 pm

Locked !

I'll feel pretty bad if I go to another country and forget to unlock it..

It goes by the IP you currently have. Maybe you're being cheeky.

Me cheeky? NI!

Anyways notice Google fi connects me to the us, currently connected to my hotspot and see something else.

Just locked my account, great work! This is actually my favorite of the recent additions to the site. Hopefully it is widely used. I see no reason for anyone to NOT use it. Even if you travel a lot, you can disable the feature at any time. 10/10 would lock again.

Do you still have it enabled?

Ok that confirmed it. The trust scan does not seem to change the "No" to "Yes" when activating it.

Edited post:

Weird, it says yes on the above profiles now after I locked my own account.

Weird, it says yes on the above profiles now after I locked my own account. I didn't check anyone else's profile before locking my own, so I can't verify this. I already have it on, and it says "On" for users with it enabled for me.

Underd?g - December 18, 2018, 10:07 am

Never even noticed this feature disappeared.

I still seems to be locked from before anyway. Glad you've added it again.

Almonds - December 18, 2018, 11:47 am

Awesome addition!

This will be of use, thank you!

webdev77 - December 18, 2018, 4:33 pm

Mine is still enabled as it was before. Nice to know this is back again. Thanks.

NoSuchAgency - December 20, 2018, 1:22 am

Love this, I had it set way back when but forgot about it. Said it's still active.

Also outa curiosity what Geo IP API do you use? I've been looking for a good one for a project

eCoLoGy - December 20, 2018, 3:41 pm

This is a great feature!

Well done Omni! ?

Cryptic™ - December 21, 2018, 1:32 am

I am out of the country and tried logging in this morning and it said my account was locked.

Had to hop onto a Canadian vpn to get back in.

Disabled it for now, will turn it back on in a few weeks when I'm back

Spaark - December 21, 2018, 1:43 am

My acc was already locked. Cheers Omni.

Uploader.sx - December 21, 2018, 3:39 am

Thank you for this.

Just 1 question, if I already logged in on my phone, and I travelled outside my country, will it log me out?

?lex - December 21, 2018, 6:21 am

This is a great addition, I wish more websites offered this!

Meow - December 21, 2018, 10:01 am

Awesome, just enabled it. I didnt know it was disabled.

Blazin - December 21, 2018, 12:46 pm

Enabled this on my account. Nice touch if I do say so myself A extra layer to 2FA is always nice.....

Roytoy - December 21, 2018, 12:49 pm

Day after day it's getting harder for people to get hacked and/or get scammed on HF. Thanks Omni!

No. You will not be automatically logged out if you travel outside of your country locked location. However if you logout manually yourself then you won't be able to log in until you are in your country lock location again.

Hop on a VPN and disable it like I did

Vyxn - December 23, 2018, 5:18 am

This features really got me curious when I'm just a regular member. Now I can use this. ?
Thank you Omni!

Asoc?al - December 23, 2018, 5:36 am

great feature. feel even more secure too. thanks omni.

I N C R E D I B L E - January 5, 2019, 9:59 am

Another great feature.

would be great if turning on and off this feature prompt for 2FA code (only for those who enabled GAUTH) from a security perspective.

iNviZ - January 6, 2019, 9:58 am

Awesome feature, can never have to much security.

Yin Yang - January 6, 2019, 10:00 am

Pretty cool extra feature right here... I just locked mine, and it's nice that you can unlock it as well.

King - January 6, 2019, 10:26 am

Happy to see it back. As always a great feature of yours.

shreder - January 6, 2019, 10:39 am

very nice and easy to use

Hiper - December 30, 2019, 7:35 pm

I am really happy to see all these features coming back. The site has improved massively.

Well done! Please don't stop updating. I always enjoy seeing new features.

emotionull - December 30, 2019, 7:37 pm

we're locked and loaded ladies

NoSuchAgency - December 31, 2019, 1:59 pm

Omni do you mind sharing what API you use/reccomend for geo up?

Country lock is easily one of the best security features we got imo.

My HF has never been hacked

It's a great feature to have tbh, I'm just paranoid of Omni blacklisting my country again which may just be game for me lmao

Right now it's not likely I'd block your country. The current list has been fine and unchanged for some time.

This is reassuring, guess i will go toggle it then!
