Vouch for Trappy. He has been selling some pretty good products here on HackForums for a while now.

If you need the help, i'm always open to writing good detailed review/vouch. Otherwise I wish you the best of luck with sales!

Let's get straight to the point. I have recently formulated a method that, after execution, is guaranteed to net several thousands of dollars per month. The method works worldwide, and the

setup time is roughly a half hour. This method is not about selling anything, and does not require you to talk to anyone, or do anything with any third party at all. You can be paid out directly to your bank account. The method requires you to more or less just click buttons and follow instructions, very little effort is required.

I've looked over the method and will now prepare a few words for you interested buyers, I can't be arsed with a fancy layout like good old Theocritus but I'm sure our reviews will be somewhat similar in content -

What you will be provided when you purchase this is a 6-page pdf with clear instructions and pictures to get you all set up with what seems like a working method to make upwards of \$14,400+ a month. (I have not tested it myself, but if I do I will update this post/thread with my earnings).

The method itself doesn't require any investments, however having some money to spend during the initial setup would save you some time. There is also an opportunity to outsource or even automate the process, which would save a DRASTIC amount of time for anyone who uses this method to make some big money. This method is scalable to the highest degree, the more time you put in, the more you will make... the profits are actually limitless.

As far as skill requirements, you really don't need anything except a computer in order to make money using this method. You can set this up the same day you buy the method and start earning right after the initial setup. I would recommend this method to anyone who has some free time and is willing to do some busywork to make very easy money!

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [\[\\$700/DAY\] #1 GUARANTEED PRIVATE MONEY MAKING METHOD | FAST & SIMPLE & PROVEN TO WORK](#) by "Trappy"

This eBook consists of 1 method and 6 pages.

The structure of this eBook is immaculate and professional looking, and there are a small number of grammatical errors.

To start this review, I would like to say that this is yet another 100% original method as far as I am aware. I have never before seen it on the HF marketplace nor any other marketplace for that matter. The contents and method itself seem quite creative and well thought out.

What you will be doing with this method is creating, or getting someone else to create a particular product for you and then, in turn, making money off said newly made product. Now it would be wrong of me to say you will make your money by "selling" this product on the site in question, but in a way, you will. Just not in the usual sense of the word. It should also be noted there are no physical products or anything like that needed or used for this method.

The structure of this eBook is as said quite clean and well made, which makes it very easy to; read through, understand and execute. This is a method that does not require you to make any investment past the initial cost of the eBook itself, but you very much can do so if you so wish.

What I mean by that is that you can either choose to invest a lot of your own time and effort into making money with this, or you can outsource all the heavy lifting for a price instead. If you do choose to do it all yourself, I am not sure how many hours it would take before you can start earning some decent money with it, but I imagine it would take at least a fair bit of work to get everything ready as well as up and running. Moreover, even when everything is set up initially if you choose to do it all yourself, you will need to do a certain amount of work each day if you want to get any significant payout from it monthly. The amount of work you do would, of course, be up to yourself,

but if you only want to invest 10 minutes a day on this and you do not have any money to outsource any of the tasks, I would say it will not net you much profit at any reasonable pace at all. That being said if you want to work on this for 10 hours a day or go hard on it, then I can see you making a substantial amount all on your own as well.

One of the best aspects of this eBook and method though is the scalability and potential earnings. Let's say that you set aside a decent chunk of change to get this method up and running right away while doing minimal work yourself; you could quickly get \$5000 or more in profit in the first month if you set it up correctly. Now personally if I were to get this method set up, I would probably set aside \$1000 to invest in it the first month or so, to get a huge return right away. However, this is far from the maximum you can scale it to. There is no real ceiling on the potential earnings with this method as it is very, very scalable like mentioned previously. Let's say you outsource all the work from day one, then quickly scale up past the first month as well, you could be looking at net profits well over \$50k a month if you scale. Also, as said this could go even higher. From a very base calculation I have made on the profitability of this method, I could get away with spending just under \$3000 a month in costs but net well over \$50k in profits, which is quite incredible. This all the while doing very minimal work myself.

Now I have not tested this method yet, nor do I have all the information like potential holds on your payouts or payout wait times, etc. However, as far as I have seen, this method looks to be working and one of the best methods on HF when it comes to scalability and originality, in my opinion. If you have any issues with this method, I would also expect OP to answer the questions promptly and appropriately as I view the member as at least reasonably HQ overall from my own experiences.

It should also be mentioned that there are multiple very helpful screenshots as well as links to get everything set up very quickly and effortlessly.

Final Thoughts

Overall, I think this is one of the better eBooks on the HF market currently, and even with minimal work and outsourcing I still expect anyone using this method to at least make a few thousand dollars a month in profit. I would be a little cautious though if you only have the \$250 for the eBook itself but not any extra money for any outsourcing and scaling already. Yes, you may acquire this money after the first month or two using this method, but I would still think about it thoroughly as I would recommend you have at least a few hours a day to do this method if you do it all yourself, though the profits will then also not be anything spectacular, though still decent.

I think people like myself are the perfect fit for this eBook — the people that have the money to use on this to quickly scale while also getting away with investing minimal time into this method itself for a substantial payoff thereafter. As said, I see no limit on how high you can push this, and unless you are shut down by the platform itself or anything of the like, \$50k a month is very attainable with the right setup, a structure as well as proper outsourcing.

DISCLAIMER: Any calculation i make on profitability from this method is only based on statistics shown in this eBook as well as my own knowledge of what i would need to scale it that highly. I have not confirmed or denied that i could make that amount of money without any issues as i have yet to test it live. But from my current calculation if it works as i believe it would then \$3000 monthly spenditure plus \$1000 extra the first month could result in \$50k monthly profit. Though again this could ofc have other issues with it i am not yet aware of.

i do not have the time to test most the products i review. this is a method i will test out but i will not see results before January at the earliest. i make my review based on the contents included and a general check of the quality and accuracy of the things mentioned in it. if and when i do get a payout from a method i have reviewed i then update my review with current and up to date information as well as being able to confirm it working. but if i was to not make this review before i would get a first payout of some sort it would probably take a month before any review at all would come out.

also on the point out payouts that is just an example of an issue that could arise though i would imagine that would only happen if you are scaling it like crazy. the point is that there could be unforeseen issues i am not yet aware of, though there might also not be any.

Trappy - December 27, 2018, 8:31 pm

Thank you all for the kind words, let's make some money.

Scatman John - December 28, 2018, 3:58 am

I have read through the entire method and started working on it.

I would like to start by saying that I have purchased more methods on Hack Forums than I would like to admit. From what I can tell, this method is 100% original. I am very glad that we aren't being sold some ATM/dropshipping/paxful/other well known guide with a small spin. If that is what you were worried about, don't. I can almost guarantee that you haven't seen or heard of this before.

I would like to mention that you will not see profits immediately with this. It will take some time, maybe a month from when you start, but that is really up to you. You can outsource some of the work. If you do, expect to invest a minimum of about \$40 for some decent returns. I am personally investing \$90-\$100 to reach my desired profits which should be in the realm of \$1700 a month. You should not expect to put in more than an hour or two a day of 'work' in order to receive similar results. There is no physical labor required, everything can be done from the comfort of your computer.

Keep in mind, this is not autopilot right out of the gate. It is possible once you are initially set up, but it will require some reinvestment to hire others to do some work for you. The steps that you'd need to take to make this autopilot aren't laid out in this guide, but you'll be able to figure it out quite easily.

Has absolutely nothing to do with Paxful, and doesn't require investment. I would also not say it is 100% whitehat but not illegal or anything either.

bladdy - January 11, 2019, 10:20 am

So, Trappy asked me to drop a review and here's my honest review on the method.

Uniqueness – 10/10

Something I've never heard of before. And I've PURCHASED multiple methods over here on HackForums.

Support – 8/10

Let's just Trappy is not that guy that is always available, but has soon as he can, he will get back to you.

Saturation - 9/10

This method exploits a major online company, I don't think this will get saturated because it would ruin the whole company's business model, but at the same time, I could see said company catching up to people using this method and starting to make it harder for people executing the method.

Method - 9/10

It will definitely take you a few days to prepare to execute the method properly, but this is such an insanely good method that it'll always pay off.

-> Unique method

-> Very slim chances of it ever getting saturated

-> HUGE PROFITS WITH NO INVESTMENT

Method

The method definetly works but earnings from the first day of purchase are not possible. You have to put a lot of work in it before you can start. You can outsource this work but even people who doing this regulary need some time to get this work done. The price for this work is as high as the price of the method or even higher.

It would consider this method as greyhat because you are exploiting a big company but in a relative

safe way so I think its unlikely to get caught. A VPN is recommended for this method. The seller provides a free N-o-r-d VPN account after purchase.

Payment

Payments are delayed so you have to wait multiple days to get your revenue. Because its a trusted company you will definetly get paid.

Proof of purchase

I purchased the method with a 10% discount code

It depends on how much daily work you put in it. With 1-2 hours per day you can earn 120\$ per day easily.

Payments are monthly.

The method is really nice, I really was impressed. Its simple and really everybody can do it. Its really scalable and really depends how much time you want to invest.
Instant earnings from the first day are possible but it would not be that much, still looking for some more days it really makes a solid Impression.

I havent received earnings yet but soon i will and i will defently update here than. As already mentioned from other reviews you will get the money delayed but the company is 100% safe.

Really like it so far and price is absolutly fair. Will update soon!

I guess nobody asked this b4: are you using your RL bank account? In my country they check all your income so tax is a big point when you make real profit over 2k a month..

Can you do it as a business? Or is is too "grey" to do everything with real name, tax ID etc?

Would like to buy the method to do it beside my full-time job but there is much to worry about regarding taxes etc.

Thanks for your answer!

I'm intrigued! Just added on my bookmarked. So any update on any of the buyers payout yet? I would like to see some of the buyers payout first before joining. And does this method work worldwide? I'm from Philippines so I would like to make sure it works in my country.

buyerfortsk - January 29, 2019, 5:15 am

Hello, I have question regarding this method, are we forced to use our own bank account for withdraw ? I don't want to be blacklisted by a big company if I get caught, your method seem to be greyhat

Do you think it will work after month / year ?

Im definitely interested, will contact you on skype

I guess my only question is...what does "monthly" mean? 1 month after they started, or a certain date each month? Is the date preset?

Got this book Fromm Trappy and I have to say, wow what a good idea. The idea does require a bit of a time investment however, if you were to put the time into this method, income is easily obtainable. If you are in a strap for a quick way to earn some side income, I encourage you to check this out. Good luck with sales Trappy
