Thread: [I can not send PM](#)

tonys4nt0s - December 19, 2018, 6:45 am

Someone can help me, I can not send private messages, I have cleaned my inbox, trash, and sent messages, when I click to send a message, there is no return and it does not work

Evanescent - December 19, 2018, 6:55 am

I think you need 50 posts to send a PM(not sure if it's still applicable).

The post count required is 25 I guess?

Yeah that can be correct to as I'm not sure.

BTW what's the error you're getting?

Have you tried clearing your cache & cookies? Perhaps try new browser?

Just clarifying that I am not the OP, in case you might have mistaken.

I guess he requires a hard refresh of cache to solve the problem.

I realized it's a bug

clicking the send button does nothing

when I give enter on the field, it sends!

You need to have 50 posts in total or you will not be able to send a message

NERO - December 19, 2018, 11:00 am

It literally says you must have 25 posts to send a private message...Cmon man, Read the [Help Docs](#)

.
