Thread: [Theme for Product Reviews](#)

Peke - December 20, 2018, 3:39 am

Hello.

I am searching for a theme looking like <https://vpnspecial.com/best-vpns>.

I would use it for other products not VPN, but I like the design.

Is there any theme looking similar to this website? If you know one, please let me know.

Regards,

Peke

I cant figure out the theme they use but it looks like its been custom coded tbh, I'd say email the owner and ask if they would give you the name of the theme they used in there website

Yeah, I tried to look for their theme as well, but looking at the page source I believe it is not even Wordpress.

I just wanted to know if anyone knows a Wordpress theme that would look like this non-Wordpress site, still searching for it, can't find one that suits me.
