Thread: [Please introduce a Crypter FUD that runtime](#)

D33PN3T - December 20, 2018, 10:35 pm

Hello

It requires a good Crypter that can runtime and bypass most antiviruses
And work with the Babylon RAT, njRAT without problems

rig123rig - December 21, 2018, 5:33 am

I use bytecrypter I can not fault it

D33PN3T - December 23, 2018, 1:11 pm

(Dec 21, 2018 06:33 AM)rig123rig Wrote: [\[CITE\]](#) I use bytecrypter I can not fault it
Capabilities Required for a File Crypt

DLL injection
RunPE
Melt
Bypass All Antivirus

IveHeardItBothWays - December 23, 2018, 6:42 pm

Go to the marketplace... But if you're serious and want something actually good you'll have to look somewhere off HF

Thanks for answer

In your opinion, Babylon RAT and njRAT are stable ?
Identify one or two stable and reliable rats

Yes you should look for these in a crypter, also I'd recommend only private stubs so your stub doesn't get detected in less than a day.

Crypters you should check out > <https://hackforums.net/showthread.php?tid=5897707> >
<https://hackforums.net/showthread.php?tid=5807160>

Both are private stubs and maximize FUD times. But you're going to fork out a lot more money but

its defenitley worth it.

Honestly bud I dont really mess with RATs. But you're going to have to drop some money if you want a good one, and that really applies to literally anything.

Please introduce a Crypter that you have used and satisfied yourself

Some guys say DataProtector V4 is a good Crypter, and some guys say Spartan Crypter is great A few months ago I bought a crypt which I did not name, it was very bad, I talked to the seller saying that I scanned the crypted file inside the virustotal, but I did not do it. (this is an excuse for Crypter vendors)

Would it be I'll pay for crypter and destroy it

Is Spartan Crypter good or DataProtector V4 ?

Are you manually crypt?

Just support the .net ?

How big is the price of your plans ?

Dude get lost.

You have no fucking idea what you are talking about.

You require completely fud using fucked up rats.

I don't ever want to hear from you.

You talk to your customers this way

You showed your character ?

I was going to reply for data but your reply... He has no tolerance for idiots. That being said I doubt
spartan would even support you, highly doubt it...

NYANxCAT - December 29, 2018, 8:58 pm

Long fud = private crypter/stub.

Pm me maybe I can help
