Thread: [Theocritus' Ebook Review for "Private Money Making Method" by Trappy](#)

Theocritus - December 21, 2018, 2:40 pm

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [\[\\$700/DAY\] #1 GUARANTEED PRIVATE MONEY MAKING METHOD | FAST & SIMPLE & PROVEN TO WORK](#) by "Trappy"

This eBook consists of 1 method and 6 pages.

The structure of this eBook is immaculate and professional looking, and there are a small number of grammatical errors.

To start this review, I would like to say that this is yet another 100% original method as far as I am aware. I have never before seen it on the HF marketplace nor any other marketplace for that matter. The contents and method itself seem quite creative and well thought out.

What you will be doing with this method is creating, or getting someone else to create a particular product for you and then, in turn, making money off said newly made product. Now it would be wrong of me to say you will make your money by "selling" this product on the site in question, but in a way, you will. Just not in the usual sense of the word. It should also be noted there are no physical products or anything like that needed or used for this method.

The structure of this eBook is as said quite clean and well made, which makes it very easy to; read through, understand and execute. This is a method that does not require you to make any investment past the initial cost of the eBook itself, but you very much can do so if you so wish.

What I mean by that is that you can either choose to invest a lot of your own time and effort into making money with this, or you can outsource all the heavy lifting for a price instead. If you do choose to do it all yourself, I am not sure how many hours it would take before you can start earning some decent money with it, but I imagine it would take at least a fair bit of work to get everything ready as well as up and running. Moreover, even when everything is set up initially if you choose to do it all yourself, you will need to do a certain amount of work each day if you want to get any significant payout from it monthly. The amount of work you do would, of course, be up to yourself, but if you only want to invest 10 minutes a day on this and you do not have any money to outsource any of the tasks, I would say it will not net you much profit at any reasonable pace at all. That being said if you want to work on this for 10 hours a day or go hard on it, then I can see you making a substantial amount all on your own as well.

One of the best aspects of this eBook and method though is the scalability and potential earnings. Let's say that you set aside a decent chunk of change to get this method up and running right away while doing minimal work yourself; you could quickly get \$5000 or more in profit in the first month if you set it up correctly. Now personally if I were to get this method set up, I would probably set aside \$1000 to invest in it the first month or so, to get a huge return right away. However, this is far from the maximum you can scale it to. There is no real ceiling on the potential earnings with this method as it is very, very scalable like mentioned previously. Let's say you outsource all the work from day one, then quickly scale up past the first month as well, you could be looking at net profits well over

\$50k a month if you scale. Also, as said this could go even higher. From a very base calculation I have made on the profitability of this method, I could get away with spending just under \$3000 a month in costs but net well over \$50k in profits, which is quite incredible. This all the while doing very minimal work myself.

Now I have not tested this method yet, nor do I have all the information like potential holds on your payouts or payout wait times, etc. However, as far as I have seen, this method looks to be working and one of the best methods on HF when it comes to scalability and originality, in my opinion. If you have any issues with this method, I would also expect OP to answer the questions promptly and appropriately as I view the member as at least reasonably HQ overall from my own experiences.

It should also be mentioned that there are multiple very helpful screenshots as well as links to get everything set up very quickly and effortlessly.

Final Thoughts

Overall, I think this is one of the better eBooks on the HF market currently, and even with minimal work and outsourcing I still expect anyone using this method to at least make a few thousand dollars a month in profit. I would be a little cautious though if you only have the \$250 for the eBook itself but not any extra money for any outsourcing and scaling already. Yes, you may acquire this money after the first month or two using this method, but I would still think about it thoroughly as I would recommend you have at least a few hours a day to do this method if you do it all yourself, though the profits will then also not be anything spectacular, though still decent.

I think people like myself are the perfect fit for this eBook — the people that have the money to use on this to quickly scale while also getting away with investing minimal time into this method itself for a substantial payoff thereafter. As said, I see no limit on how high you can push this, and unless you are shut down by the platform itself or anything of the like, \$50k a month is very attainable with the right setup, a structure as well as proper outsourcing.

DISCLAIMER: Any calculation i make on profitability from this method is only based on statistics shown in this eBook as well as my own knowledge of what i would need to scale it that highly. I have not confirmed or denied that i could make that amount of money without any issues as i have yet to test it live. But from my current calculation if it works as i believe it would then \$3000 monthly spenditure plus \$1000 extra the first month could result in \$50k monthly profit. Though again this could ofc have other issues with it i am not yet aware of.

Highly doubt someone would be earning 600k/year with a 3k investment, while the OP sells the ebook for 250... yeah ok.

Lmao for real, seems legit

Theocritus - December 21, 2018, 2:59 pm

i am saying from the knowledge i have i could get that return with the calculation i did from the stats provided in the ebook. ofc i cant confirm or deny it yet as i have yet to test it live but it is possible as ar as i have surmised. now ofc not many will be able to scale it that high or will even scale it past 1 or 3k a month, but it should still be very possible to do. ofc i do also mention that there could be holds or other unforeseen issues with payouts or account closures or what not. but based on the info in the eBook i view it as far from impossible

when i said 3k investment i meant that monthly btw, which would be around \$36k a year. and i don't know how many issues i would run into or how high i could scale it before running into some issue or other. but i still view it as possible as the scalability of this seems huge

i dont know why you write in that way but if you have a critique to make feel free to come forward with it i would be happy to respond

again i am only doing a base calculation based on the data i have. i cannot at this time confirm or deny if i would be able to do it without running into trouble with the site, payouts, holds or whatnot. all i gave was a preliminary calculation based on my knowledge of costs and stats provided in the eBook which i expect to be accurate until proven otherwise

Is this method related to fiverr or upwork?

you will not be making your money on those platforms no. but you could outsource work there if you so wish.

I just have 1 question, if the method is so good, why dont you do it Theocritus?

i will try it out, but as i already run multiple online businesses i don't always have the time. with many of the methods i get from HF i don't bother doing them as they dont show promise. this one does and i will try it out in the coming 90 or so days, but i won't be able to show any payouts even if i start today before late january or so most likely

Trappy - December 21, 2018, 4:43 pm

Thank you for taking the time to do this Theo! Let me know if I can assist you in any way.

i mean unless you get shut down it could be possible. of course if you were to make 1 million a year i would imagine you would spend maybe 200k on investment reach that number. but until i test it myself i cant say either way

Im not here to sale trash or anything like that but i just want to know something :

You sell the method for 250\$, with your method you can make thousands \$ per month

Why take the risk to get it patched or saturated ?

I have a business in a niche that bring me 6k per month on average, and im really working hard on destroying competition,im even spreading rumors to keep people away from this business, That's why I don't understand why you sell a goldmine for such a low price ? why don't you keep the method for you and make \$\$\$? there is something you don't tell us ...

Because 20~ more people doing the method does not impact my profits at all.
