You want a hardware hotspot with a ethernet port... ha, no. Better to ask how to get unlimited data on your phone then hotspot your computer.

Hi I'm looking for a thread thats obviously asking the impossible but at the least is in the wrong section. I think I found one!

Anywho, post in the correct section (not the lounge) and I think your best bet is to look for people selling ISP Giftcards cheap. OR something with AWS... which is sold in the market.

Goodluck Sweetpea.

Unlimited 1mbps is the goal.

See you had me up until you stated your ridiculous requirements my friend.

I want the same thing, hell if you find it, HOOK ME UP! ?

But truth is, this is simply unrealistic.

I have learned a lesson in life.

"If you are going to do it, you best do it correctly or pay the price overall"

- This applies to all aspects of life. ?
