Admin Cartel. Digging it.

Let's see where it goes. ?

Vitani - December 24, 2018, 12:20 pm

Is it the "Hacker tools" and "Hacker actions" sidebars?

Yes, those are part of the gaming aspects we'll be working towards implementing.

Roytoy - December 24, 2018, 12:39 pm

Can't wait for these features as I'm sure they will spice things up

Banter. - December 24, 2018, 12:42 pm

Awesome! been excited to see some updates to the crew CP! ?

I bought HackerForever to use as a roadmap for a working game. A game that people already played and enjoyed. Our task will be to create this for HF/MYBB. With fill focus it will likely be many weeks to really do everything.

HackerForever code is old but it has some good functions and will be a good guideline to what I want to achieve.

We're going to convert as much of that game into an HF game as possible.

Great. Will you also be creating CTF challenges for the crew in the future?

Hero - December 24, 2018, 1:09 pm

Hello Omni,

you might have said it before, but how much does a crew cost?

Thank you.

ok i just saw the best crew tier costs 100k bytes so around 800 dollars.

That's the whole purpose of the gaming aspects. That's like asking me if Crews are going to have Crews.

What you do think CTF is exactly? You ask about something I think you don't know what it even means. Or did you not bother even looking at the Crew page? Scroll down for the Hacker Actions menu. Those are all gaming aspects which you seem to call "CTF challenges".

CTF is a broad term for hacking competition gaming. That's what the Crews are for. IT'S THE WHOLE FUCKING POINT!

Kill Joy - December 24, 2018, 2:07 pm

Eagerly awaiting for everything crew related. :) It's still a long road ahead but one that will be worth the journey.

Something like a War Room for XMPP chat for crews would be sweet. I know we talked about this before.

Add it to the side menu or maybe have it below some element in the crew profiles.

The XMPP integration is further down the development roadmap.

Well when I tried hackerforever it seemed more like a rpg game than anything else.

CTF is not a broad term for hacking competition, it's capture the flag and nothing else.

I don't call these CTF. They are gaming aspects yes but not CTF unless there's an actual site we should hack with an actual flag we should retrieve..

Seems to encompass more than a few things.

<https://resources.infosecinstitute.com/tools-of-trade-and-resources-to-prepare-in-a-hacker-ctf-competition-or-challenge/>

Quote:CTF or Capture the Flag is a traditional competition or war game in any hacker conferences like DEFCON, ROOTCON, HITB and some hackathons. CTF games are usually categorized in the form of Attack and Defend Style, Exploit Development, Packet Capture Analysis, Web Hacking, Digital Puzzles, Cryptography, Stego, Reverse Engineering, Binary Analysis, Mobile Security, etc.

My thoughts exactly. Coming back after a lengthy period to see so many constant updates and progress really shows how much Omniscient values HF and the community.
