Thread: [\[Tools\] Some of my Tools for a Beginner](#)

F.A.S.T - December 24, 2018, 1:22 pm

I'm a Good Programmer but I do not usually make stuff in the Language I'm Good at. With that being said, Here are some of my creations.

HELLO YOU OVER THERE! Give a Review.

orphicAC

Orphic AC (Anti Chrome) is a Google Chrome Passwords Stealer that decrypts Chrome Credentials , Send the saved Credentials Via Email, Leave a message on Desktop and Self Destruct (deletes itself).

OrphicAC is written in Python3.

[OrphicAC GitHub](#)

Beacon

Beacon Remote Access Tool is a Basic Tool that allows remote access to a PC. Either silently or not-so-silently. This was created Especially for people Learning and for Teachers teaching. I myself will use this to teach my Students what and how the most used term RAT (remote access tool/ Remote administration tool) works.

Beacon is written in Python3.

[Beacon GitHub](#)

[Beacon Homepage](#)

Light Matter

Light Matter (reverse for Dark Matter) is a Multi-Purpose / Versatile Tool for the one Learning. Light Matter features Generation/Functioning of the following :MagicText - Automatically Writes Text every 10 Seconds to Scare the shit out of Victim.

MagicDesktop - Automatically Changes Desktop Wallpaper from time to time.

MagicClicks - Automatically Right/Left Click to Scare the shit out of Victim.

TrollText - Display random Message Boxes

TrollURL - Automatically open a Specified URL.

Normal log to .txt Keylogger

Anti-Chrome - Decrypt your Chrome Passwords.

Ded Virus Command Line Spammer - Python Version.

Email Spammer - GMAIL")

A Fake 'You've BEEN HACKED' Application with Graphical User Interface.

Light Matter is written in Python3.

Light Matter runs only on Windows currently. However I will update it to run for Linux too. All in

Good Time.

[Light Matter GitHub](#)

TheDestroyer

TheDestroyer is a Framework to Generate Payloads that'll completely ruin/destroy a Windows machine. The purpose of this, Like Beacon. Is to teach only. For Learning/Teaching. I strictly am against of using this against someone. Also that will be your responsibility.

TheDestroyer is written in Python3 and C++.

[TheDestroyer GitHub](#)

Thanks! I would very much love to see your review about my little pieces of work.

CyberStrike - December 24, 2018, 1:33 pm

Looks interesting, I will check it out for sure.

F.A.S.T - December 24, 2018, 1:41 pm

sh4moon - December 24, 2018, 2:05 pm

I might check this out later. what kind of options does the destroyer have?

F.A.S.T - December 24, 2018, 2:17 pm

(Dec 24, 2018 03:05 PM)sh4moon Wrote: [\[CITE\]](#) I might check this out later. what kind of options does the destroyer have?

Currently, I was able to figure out four destroyers for this. Ded, A command line spammer. Pauser, blocks mouse/keyboard. Persistent shutdown and Win32 deleter. Some of them are not yet tested as I'm stuck with Data loss problems and can't install Virtual machine yet.

Each payload is different but each causes harm.
More are coming soon.

sh4moon - December 24, 2018, 2:20 pm

might want to consider encrypting the hard drive or overwriting files. you should check out how the shamoon virus overwrote hard drives. it was known for being really effective and efficient.

FriendZone - December 24, 2018, 5:28 pm

I haven't tried yet. But your work seems pretty good!

I will take a look asap to give my feedback !

F.A.S.T - December 25, 2018, 2:43 am

if you really are that age, you shouldn't tell people your age. actually you shouldn't tell them anything about your real life. hack forums is really tame. other places aren't so forgiving.

F.A.S.T - December 25, 2018, 8:07 am

Yeah you're right. I do always set my Age to be 20 whenever I sign up for these kinds of forums/social medias/Internet. I don't usually use Social Media often so I set the Real age here.

PerfectStorm - December 26, 2018, 5:24 pm

Looks interesting thanks for sharing this

No Problem man! Just make sure you Learn!

For Networks and stuff, Beacon would be great for you. As it teaches as it runs.
