Thread: [Monetizing big t-shirts inventory?](#)

alontrone - December 25, 2018, 2:02 pm

hello everyone. So i have a big t-shirts inventory with the tools to print whatever on them. I can ship to European countries only. How can i start a business with that? Are there any marketplaces which buys directly from me or allows me to advertise my products in there?

reBELLYus - December 25, 2018, 2:05 pm

A Shopify store would work wonders here or finding a partner that needs a vendor.

If you can only ship to Europe you're obviously not the one printing them.

A lot of people make Meme t shirts then you can buy a spot on a big instagram influencer page to promote it!

Use shopify with Facebook ads and target Europe...

You must be creative in choosing designs /memes/quotes or whatever you want to print
