Thread: [*NEW* Got My Dream Car - EWhore Money - CPA/IM](#)

Cryptod - December 27, 2018, 6:33 pm

Hello Everyone,

Just wanted to say I finally got my dream car all mainly from ewhore money.
I then started to recently invest my money into CPA and Affiliate Marketing.

I'm only 20 years old. I started ewhoring when I was around 14-16 - I stopped for about 2 years and I was a district manager in sales for a big cell phone company. I lost my job last year and went threw a emotional and financial crisis all at 19. I started ewhoring again and just bought my corvette all cash money while paying my bills and saving money. I worked literally 16 hours a day every single day to make this happen and skipped pretty much every a young decent looking 20 year old could be doing... rip my social life lmao

Honestly, just wanted to hopefully inspire people. I know ewhoring is grimey and whatever but it gave a kid like me who had nothing growing up and I'm now making \$XX,XXX /mo most of it from ewhoring but a decent sized portion of it is money I've invested that's now growing. Hopefully looking to cut ewhoring off totally soon so I can make all my money legit.

Really awesome to hit this at 20 years old and I'm so excited to see what else we have in store ?

Here is some pictures of this bad boy (yes this shit's fast as hell lol):

Spoiler ([Click to View](#))

Honestly I'm just so inspired to work harder. ? ? ?

How much have you paid for it ?

And did you pay it cash or ?

Paid it in full - \$60,000 (before taxes) so around \$64,200.

I got a good deal because when I was DM for my previous company I had a connection with someone who owned the dealership by one of my old stores.

ChistoLud - December 27, 2018, 6:48 pm

Is it easy to drive that car

How many hp is it ?

At first compared to my old mustang it wasn't - but over the few couple of weeks I've been having a blast with it.

It's hella fast Imao.

It's used so the dude before already hooked it up.

I don't know how much HP and Torque it has now but stock is 455 HP / 460 Torque.

I have no idea how fast it is now and it's light as fuck too so it takes off.

Convertible too :)!

Firstly nice car bro :) I'm doing the same as you right now and just stacking up my thousands. I was also wondering if you could explain what you did with CPA and how you invested money into it as I'm looking to invest some money into something as a second source of income while I e-whore.

Follow this thread - this is one of my few incomes that I've recently developed and not at all saturated.

I did post this on another forum and it got 20,000 views already so I'd hop on it if i were you.

Just be careful with it mate

A month ago I was in a part of an accident with Audi S6 550 HP

Fast cars are extremely cool but dangerous at the same time :D

Oh I know I've learned that when I almost crashed the other day.

Lmao, I'm only speeding now really in straight high ways for about 30 seconds then I just chill.

Thanks man glad you're all good though!

Soul - December 27, 2018, 11:03 pm

Congratulations on the new car man.

I would have gone with a Hellcat over the corvette if I was in your position though.

Yeah Hellcats are 10x faster and honestly I like them a lot too.

I just like the corvette because it's sportier haha

Congrats! know ur feeling.....I bought my E class 2019 all from " same " business. but been doing it for a while :) Also looking into CPA. Will try FB ads heard its really good ? let me know if u know any serious groups with same passion and grind

Lemon-Haze - December 28, 2018, 3:33 am

Great work OP, proud of you. I remember when I got my first nice car, not my dream car mind you but it was still a huge achievement for me at the time, I could not be happier. It was a BMW 5-series, and I loved that thing to death. Enjoy tearing up the roads in your new Corvette!

It was a 2013 BMW 5 series 550i, sometimes I still miss that car. The first car I ever took over 120mph, I remember I got it to 180mph on the highway once. That V8 burned through gas like nobody's business tho lol

I feel that man haha

Mine actually has an automatic eco mode so If I'm on the highway it'll automatically deactivate cylinders and switch it to 4 cylinders in most cases saves a bunch of gas if im cruising but if I speed it'll full send.

It's actually pretty badass.

Nice car homie, my neighbour has the same one :)

Really gives me motivation to keep making money online (same ways as you) which I didn't have lately

I'm sure if he paid all in cash or he had someone to do this for him and he pays them, they won't bother

Benjamin - December 29, 2018, 6:55 pm

Congrats on the big accomplishment brother. Hopefully I can find a way to pay off my student loans and get a sweet car like u
