Saved 10k, lul that's practically what I spent on my car in 1 year.

ChistoLud - December 30, 2018, 3:04 am

I had them in my bank account when I became 18 years old.
My parents saved them for me technically :)

I was 17 years old. Funny enough it was because of this place, I use to be very active (50 posts a day etc). The people here changed my mindset and showed me what doing things differently can do. I started exchanging bitcoins and built a company out of it. Im 19 now and have everything a 19 year old would want. Own car, house, Can eat out 7 nights a week. That kinda stuff.
