Thread: [Need to send someone to help me send millions of emails](#)

CommaClub8 - December 28, 2018, 2:35 pm

Okay. So i have an idea for the website. Currently making it right now.

The goal -> Get people to understand crypto. Use Crypto. Use Crypto to buy coins etc which can go up in value. Get affiliate fees. 33+ affiliate offers. Teach people how to cash out etc / Warning etc when it comes to wallets. Give them coins info which are valuable and decentralized. Operating OTC for crypto purchases (Middleman)

I need someone to send me millions of emails. If you have email list with first names , that is excellent.

I am willing to give you a cut of 10% of the total profit in bitcoin from ALL of the affiliate offers.

I need the emails sent consistently and daily if possible. Our goal should be to reach 8M by End of January. I think this is big , but i'm aiming high. Our goal should 80% Inbox rate with 60-70% open rate with 10% of those becoming customers and users which bring in profit. We should expect to get 100BTC in revenue if all goes well. Once this happens , We need to scale up quickly. You will given your cut through BTC , And i will get promotions for the site and gather insight into our campaign.

Contact me. This is a partnership , If you can do what i need , we can work well together.

There are new fortunes to be made , Come join me take a piece of it.

A few questions.

What role would you play in this operation and what role would I play?

Are you looking for millions of cold emails?

With cold emails you will probably get a 10% open rate if you're lucky.

You may get better results with a warm list if you're a celebrity or if you're willing to invest hundreds of thousands of dollars to build a list of that size.

I would play the "Collect affiliates + make music + film to promote website to normies. You would send emails for the project and building an audience. I will also be growing the website via seo and promo. Making content for the website , to teach people how to make money and automate their profits.

I'll try some subject headings which will be used to get people to open the emails. We will test multiple subject lines and bodies to find the most optimum subject line and body. Feb will be a time for insight and learning from the data. In March , we will target institutional investors / hedge funds / VCs etc to usher in the institutional phase into crypto.

I was thinking of promoting on multiple social media websites to increase awareness.

let me know.
