Thread: [Hysteric/Parranoid uid=3921080 - FAKE BULLETPROOF HOSTING - LYING TO SELL OFF PROJECT](#)

Pronouncer - December 28, 2018, 7:15 pm

Parra/Hysteric Community Alert

User: <https://hackforums.net/member.php?action=profile&uid=3921080>

Threads:

Haze Host Sales Thread - <https://hackforums.net/showthread.php?tid=5920396>

Haze Host PROJECT on sale - <https://hackforums.net/showthread.php?tid=5922556>

Now you might be wondering why this is a community alert the User is entirely lying about the product and service and even got caught out on Numerous things.

First of all the Domain being HazeHost.com, the user can try deny it but the logo is the same as in his signature.

(Turns out while writing this he denied its his)

Yet, the domain registered 2 days before the thread Hmmmmmm

Lets analyse their domain ETC.

Domain Pings to a IP

Luxembourg host owned by OVH? Hmmmm

Now lets do a basic Who is?

For a bulletproof host why you using Namecheap?

Code WHOIS search results

Domain Name: HAZEHOST.COM

Registry Domain ID: 2343998060_DOMAIN_COM-VRSN

Registrar WHOIS Server: whois.namecheap.com

Registrar URL: http://www.namecheap.com

Updated Date: 2018-12-17T16:15:54Z

Creation Date: 2018-12-16T22:51:28Z

Registry Expiry Date: 2019-12-16T22:51:28Z

Registrar: NameCheap, Inc.

Registrar IANA ID: 1068

Registrar Abuse Contact Email: abuse@namecheap.com
Registrar Abuse Contact Phone: +1.6613102107
Domain Status: clientTransferProhibited <https://icann.org/epp#clientTransferProhibited>
Name Server: NS1.MYCPANELDASHBOARD.COM
Name Server: NS2.MYCPANELDASHBOARD.COM
DNSSEC: unsigned
URL of the ICANN Whois Inaccuracy Complaint Form: <https://www.icann.org/wicf/>
>>> Last update of whois database: 2018-12-29T02:44:23Z <<<

Lets go into the seller now.

Seller decided to sell the project <https://hackforums.net/showthread.php?tid=5922556>
and stuttered under pressure.

User claims that he paid \$50 for reseller and made back 90\$.

Also trying to say we are not buying the project? What are we buying from him. Seeing as we dont get the current customers? Which surely are linked to the autobuy system

Then on his other thread says he paid 0? Now why you lying to customers to try and sell your shit.

Lets do some basic maths.

Domain = \$30
WHMCS = \$20
Reseller = \$50

You sell for \$3, 20 Clients = \$60

Now where is this profit?

Next.

Disproving bulletproof.

"I am reselling servers from a Luxembourg company. I don't own the hardware. ISP ignores requests. All the info on the servers is the info I specified, so I get all the notices."

However the ISP doesnt ignore requests does it seeing as its OVH?

<https://hackforums.net/showthread.php?tid=5920396&pid=58064449#pid58064449>

For those of you who dont know what bulletproof is, its hosting that allows everything.
Now luxembourg is good for DMCA but it for 100% is not bulletproof.

"I am the DNS admin so I can allow whatever I want. Simply ignore takedown notices. It is indeed reseller."

Now this means absolutly nothing. You may manage the DNS to your clients. But you are a reseller. You are not bulletproof. The fact your site is hosted on OVH network is a whole other thing. For those of you who dont know who OVH are, they are one of the biggest hosts that also co-operate

with police.

<https://hackforums.net/showthread.php?tid=5922556&pid=58064439#pid58064439>

"The WHOIS on the NS and IP lead to me."

<https://hackforums.net/showthread.php?tid=5922556&pid=58064458#pid58064458>

The seller doesnt realise take downs happen at the registrar level not the reseller.

User went from denying he owns it to saying the host might be OVH? Do you not know what you are selling

<https://hackforums.net/showthread.php?tid=5920396&pid=58064600#pid58064600>

Also user was looking for a web dev a few weeks back now mystically owns a bulletproof host.

The biggest meme of all is this the person you want to trust

Next time dont go around throwing shit on my name saying i scammed a bunch of people. Learn your own shit.

Good community alert Pro, I will give you that much. Few things you got wrong. I do not use WHMCS because I gotta stay within that 60\$ threshold, remember! Second, I do not know where you buy domains but 30\$ is pretty damn expensive for NameCheap. Lastly, the whole OVH shit has nothing to do with me. I use a Luxembourg company. The company is the same one that Horus God uses. They use OVH as their site hosting, I do not.

This kid is pure retarded.

First he posted hazehost.com as his domain, quickly redacted his post and changed it completely and then totally denied ownership of it.

First - OVH although they do lease IP's out, not for those specific purposes. They provide fault tolerance backup IP#'s. So WRONG

Second - I have personal Contacts in OVH Montreal, I use them myself very often. I am sure a call to them wont hurt, right? Let them know your offering illegal "Bullet proof" hosting for malware on their racked servers and IP# ranges. I am sure a CANADIAN COMPANY will have zero problem with this whatsoever. ?

Thirdly, I am glad you like my comment, maybe take some advice from it and log off and go the fuck outside and get some fresh air you basement dwelling momas boy.
