Thread: [About the new bonus bytes if you donate bytes...](#)

Net - December 30, 2018, 8:05 am

Talking about this.

Literally, the first thing I thought about is people abusing this system. Like 2 users sending each other 10 bytes constantly, till they get the bonus.

Don't think it happened yet, but it might happen in the future.

What are the chances of getting the bonus?

Elitas - December 30, 2018, 8:19 am

Yeah, makes sense. But bytes fees probably outweigh this. Thus making abuse not profitable.

There is no fee for donating bytes, but OP abuse usually gets noticed rather quickly and the users tend to get banned for it.

Anonymouse™ - December 30, 2018, 10:09 am

is this why i randomly received bytes from someone without any reason?

Omniscient - December 30, 2018, 11:39 am

It's not really an issue.

Geass - December 30, 2018, 11:59 am

Maybe there is a limit on sending donations per day, for example 10 donations per day.

PerfectStorm - December 30, 2018, 8:26 pm

If it only happens once per day the chances of someone effectively abusing the system would be low. Would it not? how many 10x donations does it take to get to 250? not that many.

reBELLYus - December 30, 2018, 8:39 pm

I don't see this being a huge issue. The chances of this being abused are slim to none.

NurSpec - December 30, 2018, 11:01 pm

I think it's a non-issue. I doubt anyone will try and abuse the system and risk losing their bytes and/or account.

Jimmie - December 30, 2018, 11:32 pm

Easy fix anyway set a minimum donation amount and change the algorithm so people can't profit from it.

Roytoy - December 31, 2018, 7:09 am

Omni would probably close them right on the spot

S2K - *December 31, 2018, 7:46 am*

250 bytes in a day not a big deal imo

Ram - *December 31, 2018, 7:59 am*

Lol what are the chances in million users sending bytes everyday to get this.
