It's not 100\$ per crypt, it's 100\$ per private stub that can be used to crypt multiple files.

I declined giving him one because he has previously lied about me being a scammer and he said that he'd keep all his false comments about me up

Could I get a staff member on this?
Give out vouch copies to prove him wrong

Purchased.

Downloaded file is corrupt.

Once I receive files I will update review.

UPDATE: Seller has not sent Crypter or stub. Will update again if this changes.

UPDATE: Received files. Crypter does not open or run. tested on 3 computers.

UPDATE: seller sent a new Crypter file. the crypter opens a second "container file.exe" that has to be forced closed in task manager. Also the crypter is still not working, it gives some VERSION.dll error/bad image error and randomly opens an old Spartan crypter file on my computer. If anything changes and or starts working I will update again.

This is a complete waste of time trying to Deal with seller as they are incompetent and uneducated.
Do not purchase unless you're looking to waste money and infect yourself with a RAT.
