Thread: [Any way to Bot ADDMEFAST?](#)

LeonBang - January 1, 2019, 11:20 am

Yoooo HF,

is there still anyway to get ADDMEFAST coins with a Bot or a Script?

If yes could u send it to me?

Thanks ?

FeedLad - January 1, 2019, 5:12 pm

I used iMacro 4-5 years back, it used to work wonders with FireFox, but within the past year or so addmefast seem to of stopped it by raising the timeout. Be good if there was another way though!

Dark Spider - January 2, 2019, 10:00 am

I use Selenium

My bot is on Github Search a bit

Hi im using your bot but when i try to log in addmefast with the bot the captcha comes in and i cant do the captcha while the bot is working

Pinkman889 - January 7, 2019, 10:13 am

There is a Firefox addon called iMacros i generate with this since 4 Years on addmefast

Ivex - January 9, 2019, 3:29 pm

iMacros still works... ish. Not as good as it used to be but can still farm points. Just make your own iMacros. I know nothing about botting but I can still do it so dw its easy.

After a few times a Captcha pops up for me, can't do that with iMacros... :/

Oxyd - January 13, 2019, 10:29 am

iMacros or Selenium (+) would do the job.

If there is a captcha, look for some solution on github. (<https://github.com/ecthros/uncaptcha2>)

Hack3Ever - January 14, 2019, 11:13 am

Sincerely Addmefast is dead, I used to use my own bot, I used it a few months ago to inflate my twitter but the web is dead.
