What can you bring to the group?

I am someone who has been working with online marketing for a long time. I understand how the current online markets are ran and how they attract and keep customers. I am able to help other group members increase conversion rates across many different types of stores from Shopify, Ebay or Wordpress. I also know a lot about psychological marketing manipulation and can help with that.

I also offer free Ebay boosts to other members in the group if they need it. This includes Ebay Views & Watchers to add social proof and rank their listings higher.

Are you willing to actively participate in the group discussions?:

Of course. I also plan on actively creating discussions based around marketing and networking as you can never really learn enough.

I also know I'm that not an UB3R but I would greatly appreciate it if you still take my application into consideration. Thank you :)

If enough are interested, I can go into details about different vulnerabilities to look out for, what's most common, and some of the methodologies that I picked up along my journey.

Are you willing to actively participate in the group discussions?:

Most definitely. You can't receive with a closed hand.

I'm into different types of business, mostly online but also love some offline "cold" interaction. Whether it's cryptocurrency, social media, ecommerce - I'm your guy. This is my first time applying for a group.

**In Crypto We Trust** - June 12, 2019, 9:49 am

In Crypto We Trust's Group/Crew Application

Username: In Crypto We Trust

Profile link or ID: UID: 4259062

List your talents and abilities: The main thing that I am into is trading Crypto-Currencies, I study charts of lots of alt-coins and invest into them accordingly, I make all of my decisions by myself, So if I was to join a Group, I could in turn help other members get into trading Crypto-Currencies and make money along with them. I also code in multiple languages if that would be any assistance to your group, I studied 2 years of Computer Science and I am now fluent in Java, C+, C#, HTML, Python. I don't code as much anymore as I'm onto bigger and better projects (Regarding Crypto) But I could also share some of my knowledge about those coding languages with other group members as I would say that I'm very good at them all, could also write some programs for you/other members.

What are your hobbies?

I used to be heavily into gaming, but more recently I'm focusing on my future and making money now while I'm young so I can live independently and make money doing what I love (Which is trading Crypto-Currencies, I'm really interested in new ICO's/Altcoins, I usually study graphs of what I think would have some potential and then go from there whether or not I want to invest into that coin, If I was in this group I could share some signals and what I think about new coins in general or the direction that crypto currencies are going, Would be able to make some other members money If they followed my signals and my instructions)

Will you be able to remain active within the group?

I used other forums, But I only registered here a few days ago as I used to use other forums but never really gave this forum a chance, Just didn't have the motivation too, but now I'm gonna be

using it all the time and make friends, money & share my knowledge with others so that I can in turn, help them make money and teach them how to trade/code etc. I will be very very active from now on (as you can see already if you compare my posts to my registration date) I'm already very familiar with this forum and cannot wait to make some sort of a good name for myself

Will you be willing to participate in group activities and events?

Yes, 100% and I will also contribute/host giveaways for the other group members, And I would participate in group activities and events gladly, I've been in groups on other forums but they are so much better here.

Will you be able to make at least 1 reply a week and at least 2 quality threads a month?

Yes, I will make way more posts than that and threads, my activity will be outstanding and I will contribute all my free time to this forum/the group, My job is basically trading Cryptocurrencies, So I will always have HackForums open on one of my monitors whilst I trade, So I will ALWAYS be active, i will also be very approachable to all other members

Why should you be considered to be apart of this group?

I feel that alot of members in the group could learn something from me, I will also mentor other members free of cost, To teach them the basics of coding/trading cryptocurrencies and in turn give them a life-skill that they could use in many places/for many things. (Also my other replies would help this answer) I would absolutely LOVE to be apart of this group, Thank you. Please consider me.[/b]

**Anti'** - June 21, 2019, 7:54 am

Anti's group application

Username: Anti' UID: 2324196 Age 20 Location: Finland

Areas of passion and talent: I'm a gamer, i mostly play competitive games like csgo and dota. (Not that im good at them, i just like the competitive side of the game?) I'm also into music, mostly rap but i occasionally dabble in experimental/ alt rock. I would love to talk and share my favourite music. I also edit videos, i mostly end up scrapping them but every now i get bursts of motivation and i get them finished. I would like to talk about editing and share different techniques and effects, and receive feedback and also critique other peoples edits or cinematography. I have also dabbled into coding, mostly pasting stuff together, not that good at coding but i like to think i have the basics down and could probably help beginners.

Why do you wish to join the group?: I'm looking for high quality discussion, mostly of the topics mentioned above, but also of news, science, religion, or anything that comes to mind. I feel like i would learn something from the group, and the group would learn something from me.

Are you willing to actively participate in the group discussions?: Yes, i would most definitely contribute to the discussion. Even though i haven't been very active, if i would get in to the group, i would definitely participate in the subforum and remain active within the group.
